**STATE GUIDELINES
FOR THE
CONSERVATION COST-SHARE PROGRAM**

PROGRAM YEAR 20

Program Year Begins: April 1, 2019
Program Year Ends: September 30, 2020

Allocation Period Begins: April 1, 2019
Allocation Period Ends: September 30, 2019

Oklahoma Conservation Commission
in cooperation with
Oklahoma's 84 Conservation Districts

Approved by the Conservation Commission on, _____ 2019.

I GENERAL

The Oklahoma Conservation Commission hereby declares that the following problems are having a detrimental effect on the renewable natural resources of our state:

Oklahoma's water and soil resources are an important foundation of the state's economic infrastructure. Natural climatic events as well as human activity are impacting these two natural resources. As long as farmers and ranchers produce food from the land to feed the world and the wind blows and the rain falls, we will continue to see impacts on soil and water. Our task as stewards of these natural resources is to minimize these impacts. Protecting these vital natural resources is paramount in preserving the state's economic future. In order to accomplish this goal, the Conservation Commission hereby establishes the following goals and objectives to address these problems affecting our renewable natural resources:

Make cost-share funds available to conservation districts so that they can implement cost-share practices which will protect our soil and water natural resources.

The Conservation Commission herein establishes the complete list and description of the conservation Cost-Share Program policies and conservation practices approved for use by the conservation districts during Program Year 20. See Section II for the approved list of conservation practices with their respective range of cost-share rates for each of the Conservation Cost-Share Program initiatives. State cost-share average costs (unit cost) are based on Oklahoma Natural Resources Conservation Service (NRCS) data.

Any exceptions from these established Conservation Cost-Share Program policies and guidelines shall be approved by the Conservation Commission.

II ALLOCATION OF FUNDS

A. Locally Led Conservation Initiative

The Conservation Commission allocates \$1,365,000 of FY 2019 appropriations to the Conservation Cost-Share Fund for the purposes of providing cost-share payments to eligible participants for implementing approved cost-share conservation practices.

B. Conservation District Allocation

The amount of funds allocated to each conservation district from the FY 2019 appropriation for Program Year 20 appears on page 12. These funds will be available to conservation districts on April 1, 2019.

Conservation districts that have unobligated Program Year 19 funds may submit a request to the Conservation Commission to carry those funds over for use in

Program Year 20. Requests will include the district's final Program Year 19 Monthly Report. The amount of each district's carry over funds will be based on their performance ranking during Program Years 16, 17, and 18.

III POLICIES

A. Allocation Period

The allocation period shall start April 1, 2019 and end September 30, 2020. Any funds allocated to districts and not obligated during the allocation period for Program Year 20 will be released by the district and made available for reallocation by the Conservation Commission. Funds become obligated to a participant after approval of the application by the board and a performance agreement has been signed and dated by the district board and the participant.

B. Authorized/Designated Representatives

The district board must designate an authorized district representative. This person can sign all forms. The authorized district representative must be a district board member. It cannot be a district employee.

The district must designate a technical representative. The designated technical representative will assist in developing conservation plans and determining the need for conservation practices. The representative will also be responsible for design and layout of approved conservation practices, determining compliance with approved standards and specifications, and certifying conservation practice quantities and completion of conservation practices.

C. Conservation Practices

Each district board may select any of the approved cost-share conservation practices within the Locally Led Conservation Initiative for inclusion in the district's local guidelines. The selection should be based on which practices will best address the district's highest priority problems affecting renewable natural resources.

Cost-share practices shall be implemented according to NRCS standards and specifications. In the event NRCS standards and specifications do not exist, conservation practices must meet Conservation Commission approved standards and specifications.

D. Average Costs

State average cost (unit cost) for these practices is based on Oklahoma NRCS data. In order for a variance to be considered the request must be in writing and accompanied by supporting data compiled by the district. The variance rate must be approved by the Conservation Commission prior to the board's approval of Program applications and performance agreements being signed.

E. Cost-Share Payments

The minimum cost-share payment amount that shall be made to any participant from these funds is \$100. The maximum cost-share payment amount that shall be made to any participant from these funds is \$5,000.

F. Cost-Share Rate

The maximum cost-share rate for these practices is 75%. District boards may choose to set cost-share rate less than the specified rate.

G. Eligibility

Applicants for the Conservation Cost-Share Program must be a district cooperator with a conservation plan.

Conservation Commissioners, Conservation Commission staff, conservation district employees or the spouses of any of these people shall not be eligible to participate in the Conservation Cost-Share Program.

Conservation district directors are eligible to participate in the Conservation Cost-Share Program. Due to the limited amount of funds available for Program Year 20 individual directors should give careful consideration to public perception when making their decision to participate in the Program. If the local board votes to allow board members to apply for Program Year 20 the guidelines below will be followed.

1. Individual district board members applying cannot discuss any element of the Cost-Share Program including but not limited to practices, rates, average costs, selection criteria, application approval/disapprovals, cost-share payments, and extensions.
2. Individual district board members applying for the Cost-Share Program must abstain from voting on all elements of the Program.
3. Individual district board members cannot use their position as a conservation district board member to improve or elevate their individual chances of becoming a successful applicant.

H. Agreements

All Program Year 20 performance agreements must be signed and dated by the district board and participant on or before September 30, 2019. All Program Year 20 performance agreements must be completed and the check in the hand of the participant on or before September 30, 2020. Installation of conservation practices cannot begin until an effective performance agreement is in place. A performance agreement becomes effective on the last date of signature. Each participant should have only one performance agreement.

Each participant is required to sign a maintenance agreement. Completion of the maintenance agreement and signature of the participant are required prior to the disbursement of the cost-share payment.

IV APPROVED CONSERVATION PRACTICES

Contained in this section is a list of all conservation practice's approved for use in the Program Year 20 Locally Led Conservation Initiative. The conservation district shall only use conservation practices listed here unless a special request is approved by the Conservation Commission. In order for a conservation practice special request to be considered the request must be in writing and accompanied by supporting documentation. The special request must be approved by the Conservation Commission prior to the board's approval of Program applications and performance agreements being signed.

State average cost (unit cost) for these practices is based on Oklahoma NRCS data. In order for a variance to be considered the request must be in writing and accompanied by supporting data compiled by the district. The variance rate must be approved by the Conservation Commission prior to performance agreements being signed.

Below are the conservation practices approved for Program Year 20.

314 - Brush Management

Definition: The management or removal of woody (non-herbaceous or succulent) plants including those that are invasive and noxious.

Purpose:

- Create the desired plant community consistent with the ecological site or a desired state within the site description.
- Restore or release desired vegetative cover to protect soils, control erosion, reduce sediment, improve water quality or enhance hydrology.
- Maintain, modify or enhance fish and wildlife habitat.
- Improve forage accessibility, quality and quantity for livestock and wildlife.
- Manage fuel loads to achieve desired conditions.
- Pervasive plan species are controlled to a desired level of treatment that will ultimately contribute to creation or maintenance of an ecological site description "steady state" addressing the need for forage, wildlife habitat, and/or water quality.

315 – Herbaceous Weed Control

Definition: Removal or control of herbaceous weeds including invasive, noxious and prohibited plants.

Purpose:

- Enhance accessibility, quantity, and quality of forage and/or browse.
- Restore or release native or create desired plant communities and wildlife habitats consistent with the site potential.
- Protect soils and control erosion.
- Reduce fine fuel loads and wildlife hazard.
- Pervasive plan species are controlled to a desired level of treatment that will ultimately contribute to creation or maintenance of an ecological site description "steady state" addressing the need for forage, wildlife habitat, and/or water quality.
- Improve rangeland health.

338 – Prescribed Burning

Definition: Controlled fire applied to a predetermined area.

- Purpose:
- Control undesirable vegetation.
 - Prepare sites for harvesting, planting or seeding.
 - Control plant disease.
 - Reduce wildfire hazards.
 - Improve wildlife habitat.
 - Improve plant production quantity and/or quality.
 - Remove slash and debris.
 - Enhance seed and seedling production.

412 - Grassed Waterway **(new structures only)**

Definition: A shaped or graded channel that is established with suitable vegetation to convey surface water at a non-erosive velocity using a broad and shallow cross section to a stable outlet.

Purpose:

- To convey runoff from terraces, diversions, or other water concentrations without causing erosion or flooding.
