# Cottonwood #54

# Hazard Classification Change

- In 2006 NRCS-USDA conducted a hazard classification review of Cottonwood 54
  - 26 homes located in the breach inundation
  - changed from significant hazard to high hazard.

# History

- Structure built in 1970's (for flood control only)
- Area was platted by a developer/landowner (Crowder)
- Easement was released by Quit Claim Deed in 1977 to an elevation two feet above top of dam elevation due to landowner/developer pressures
- Homes built all around the lake
- Home Owners/Lake Association
- Many homeowner lots actually ascend into the lake
- Homes built up next to the dam

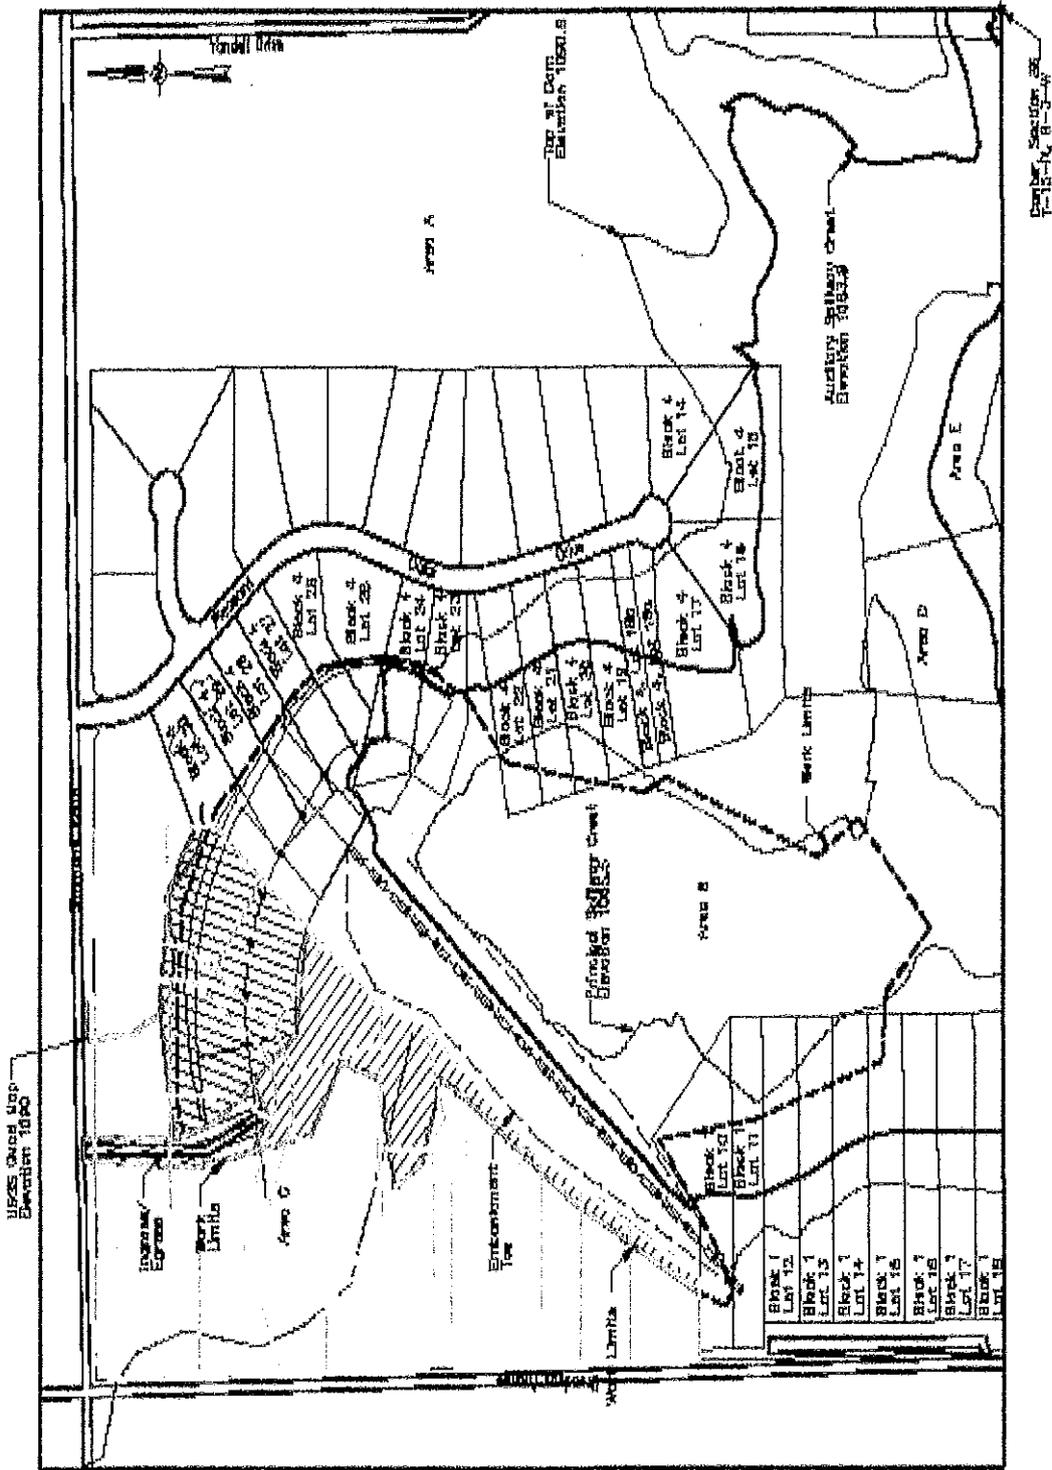

# Continue

- One home built below the auxiliary spillway crest elevation
- Water Permits
- Landowners (Crowder) with property behind dam – pole barn/ discuss water flowage across this land
- Many homeowners have built docks into the water and made improvements

# #54 Surrounded by homes

# Plat Map

# Downstream Development

## Challenges of Modifying This Structure

- NRCS starts working on the plan for rehabilitation in 2007?
- Can't raise the dam because of homes built right next to the dam and the dam is near a county road
- Can't extend the spillway without taking out homes
- What to do?
  - Decision to lower the water level in the lake by over 4 feet to get the height on the dam and the needed water storage required and get the one house below the auxiliary spillway crest protected
  - Lower the auxiliary spillway to get the water flow capacity required

# Landowner Responses

- Logan Cty CD and NRCS hold multiple landowner meetings
- Angry/Threatening lawsuits
- Raise multiple concerns (restricts recreation, fire, increase bugs, a taking by lowering of the water thus decreasing home values)
- Easements do not cover “rehabilitation”

- Landowners (Crowder) behind dam
  - ⊗ Easement concerns
  - ⊗ Loss of ability to build homes on already platted property
  - ⊗ Want paid six figures for the removal of an old pole barn located in our easement, the district had offered \$10,000.00, in an effort to prepare for construction

# Options

- Move forward with construction?
  - Once contracted then this can get messy/ wait for them to sue, seems highly likely to occur
- Do nothing?
  - Violation of the state dam safety act /failure to protect the homes downstream
- Condemnation?
  - Already have an easement
- Declaratory Action?

# What is a ‘Declaratory Action’

- Individuals may seek a declaratory judgment after a legal controversy has arisen but before any damages have occurred or any laws have been violated.
- A declaratory judgment differs from other judicial rulings in that it does not require that any action be taken. Instead, the judge, after analyzing the controversy, simply issues an opinion declaring the rights of each of the parties involved. A declaratory judgment may only be granted in actual controversies that fall within a court's jurisdiction.
- A declaratory judgment, sometimes called declaratory relief, is conclusive and legally binding as to the present and future rights of the parties involved. The parties involved in a declaratory judgment may not later seek another court resolution of the same legal issue unless they appeal the judgment.

# What Controversy Exists?

- Easements
  - Are the easements sufficient?
  - Do they cover modifications of this type?

# Statutory Language

- In 2008 the Oklahoma Legislature passed 27A § 3-3-411 (B)

“Pursuant to the Conservation District Act, the phrase “operation and maintenance” or “operate and maintain” as used in a variety of contractual documents, easements, statutes, rules, and other legal authority by the conservation district and their assigns shall be interpreted to:

- Encompass the terms, repairs, modification, alteration, rehabilitation, upkeep, upgrade, improvement, construction, reconstruction, decommission and inspection and;
- Benefit the state and conservation districts

- **Does this apply Retroactively**

# Other Landowner Challenges

- Right of project sponsor to lower the water level in the lake (permanent pool) permanently
  - Oklahoma has had no legal precedence or case law regarding this issue
- Any private property taken or damaged for which compensation must be paid to landowners for lowering the water in the lake (i.e.. Docks, pole barn...)

# Majority Rule on Water Level

- The proprietor of a dam has an unqualified right to remove, alter, or abandon the dam including the water level
- The fact that a property owner has used or improved their property with reference to the artificial lake created by another's dam does not confer the property owner with property rights in the continued water level of the lake
- Nebraska, Kentucky, Massachusetts, Rhode Island, Connecticut, Washington and Michigan

# Legal Action Timeline

- Logan County CD files a Declaratory Action in March 2011
  - asking if they have the right to perform work on Site 54 with current easements
  - if they can lower permanent pool, &
  - that no taking is occurring that requires compensation
- The facts are presented to the District Court of Logan County
  - Orally
  - Written
- September 2014 the District Court rules in favor of the district on all issues

# Appeal Timeline

- Landowners appeal District Court decision
- District files a Motion to Retain of the appeal to Oklahoma Supreme Court
- December 2014 the Supreme Court grants the Motion to Retain
- On June 7, 2016 the Supreme Court issues its 24 page opinion confirming the district court decision on all issues– independent research conducted by the court.  
(Note – seismic footnote)

# Analysis

- Easement – construct, operate, maintain, inspect, enter, water storage
  - Imposed duty on Grantee to inspect, maintain, and repair so as to function safely (District responsible for OM)
  - Easement not unambiguous
  - Plain ordinary meaning of words “operate” & “maintain”
  - 27A § 3-3-411 can be applied retroactively ; conforms to plain meaning of words and original purpose of the Act
  - Foreseeable repairs and changes; perpetual (open ended)
  - Illogical to sanction routine inspection and maintenance but prohibit repairs
  - Repairs includes all new an improved methods
  - Unless specified in the easement, it is assumed Grantee must conduct repairs, so long as on the property in the easement
  - Manner, frequency, intensity of use may change over time
- Permanent Pool level – draining for repairs and permanent lowering
  - No set water level in easement, water fluctuates
  - Yost case – dam owner need not maintain for the benefit of upper riparian owners
  - No taking, no compensation

# What does this mean?

- Start Construction
- Landowners must remove all structures; no payments for removal
- Clarifies for all Districts
  - The easements; rehabilitation;
  - Water level fluctuations, draining, lowering
  - 27A § 3-3-411

**GUIDELINES  
FOR THE  
MONARCH HABITAT INITIATIVE  
Cost Share Program**

**PROGRAM YEAR 1**

Program Year Begins: September 1, 2016  
Program Year Ends: December 31, 2017

Allocation Period Begins: September 1, 2016  
Allocation Period Ends: January 31, 2017

Oklahoma Conservation Commission  
in cooperation with  
Logan County Conservation District  
Oklahoma County Conservation District  
Cleveland County Conservation District  
McClain County Conservation District

Approved by the Conservation Commission on September 1, 2016.

## I. GENERAL

The Oklahoma Conservation Commission hereby declares that the following problems are having a detrimental effect on the renewable natural resources of our state:

Populations of the monarch butterfly (*Danaus plexippus*) have experienced alarming reductions during the past 20-plus years. The decline in the subspecies (*Danaus plexippus plexippus*) that breeds east of the Rocky Mountains has been identified as being of particular concern. Several factors, including the absence of naturally occurring fires within this region of Oklahoma and the encroachment of eastern red cedar is altering the vegetation structure of native grasslands, resulting in more brush and tree species and less native bunch grasses and nectar-producing forbs across the landscape.

Through conservation programs and technical assistance, OCC will work with partners and clients to improve and/or increase monarch habitat on private lands along the I-35 monarch migratory corridor in Oklahoma.

The Conservation Commission herein establishes the complete list and description of the Monarch Habitat Improvement Cost-Share Program policies and conservation practices approved for use by the conservation districts during this program year. See Section II for the approved list of conservation practices with their respective range of cost-share rates for each of the Monarch Habitat initiatives. Cost-share unit costs are based on Oklahoma Natural Resources Conservation Service (NRCS) Monarch Habitat Development data.

Any exceptions from these established Monarch Habitat Initiative Program policies and guidelines shall be approved by the Conservation Commission.

## II. ALLOCATION OF FUNDS

### A. Monarch Habitat Initiative

The Conservation Commission allocates \$102,400 of USFWS grant funds for the purpose of providing cost-share payments to eligible participants for implementing approved cost-share conservation practices to improve monarch habitat.

### B. Conservation District Allocation

Cleveland County Conservation District, Logan County Conservation District, McClain County Conservation District and Oklahoma County Conservation District will each receive \$25,600 in which to implement the Monarch Habitat Initiative cost share program. These funds will be available to the conservation districts on September 1, 2016.

Each district may choose to use up to \$1,000 for establishment of monarch way stations within established public outdoor classroom sites and/or city parks.

### III. POLICIES

#### A. Allocation Period

The allocation period shall start September 1, 2016 and end January 31, 2017. Any funds allocated to districts and not obligated during the allocation period for Program Year 1 will be released by the district and made available for reallocation by the Conservation Commission. Funds become obligated to a participant after approval of the application by the board and a performance agreement has been signed and dated by the district board and the participant.

#### B. Authorized/Designated Representatives

The district board must designate an authorized district representative. This person can sign all forms. The authorized district representative must be a district board member. It cannot be a district employee.

The district must designate a technical representative. The designated technical representative will assist in developing conservation plans and determining the need for conservation practices. The representative will also be responsible for design and layout of approved conservation practices, determining compliance with approved standards and specifications, and certifying conservation practice quantities and completion of conservation practices.

#### C. Conservation Practices

Each district board may select any of the approved cost-share conservation practices within the Monarch Habitat Initiative for inclusion in the district's local guidelines. The selection should be based on which practices will best address the district's highest priority problems affecting monarch habitat.

Cost-share practices shall be implemented according to NRCS standards and specifications. In the event NRCS standards and specifications do not exist, conservation practices must meet Conservation Commission approved standards and specifications.

#### D. Unit Costs

Unit costs for these practices are based on Oklahoma NRCS data. In order for a variance to be considered the request must be in writing and accompanied by supporting data compiled by the district. The variance must be approved by the Conservation Commission prior to the board's approval of Program applications and performance agreements being signed.

#### E. Cost-Share Payments

The minimum cost-share payment amount that shall be made to any participant from these funds is \$100. The maximum cost-share payment amount that shall be made to any participant from these funds is \$5,000.

#### F. Eligibility

Applicants for the Monarch Habitat Initiative must be a district cooperator with a conservation plan.

Conservation Commissioners, Conservation Commission staff, conservation

district employees or the spouses of any of these people shall not be eligible to participate in the Conservation Cost-Share Program.

Conservation district directors are eligible to participate in the Monarch Habitat Initiative Cost - Share Program. However, due to the limited amount of funds available for this program individual directors should give careful consideration to public perception when making their decision to participate in the Program. If the local board decides that board members can apply and board members choose to apply for the program; the guidelines listed below must be followed.

1. Individual district board members applying cannot discuss any element of the Cost-Share Program including but not limited to practices, unit costs, selection criteria, application approval/disapprovals, cost-share payments, and extensions.
2. Individual district board members applying for the Cost-Share Program must abstain from voting on all elements of the Program.
3. Individual district board members cannot use their position as a conservation district board member to improve or elevate their individual chances of becoming a successful applicant.

**G. Agreements**

All performance agreements must be signed and dated by the district board and participant on or before January 31, 2017. All Program performance agreements must be completed and the check in the hand of the participant on or before December 31, 2017. Installation of conservation practices cannot begin until an effective performance agreement is in place. A performance agreement becomes effective on the last date of signature. Each participant should have only one performance agreement.

In addition to the performance agreement; landowners will be required to sign a Partners for Fish and Wildlife Program Landowner Agreement as prescribed in Exhibit A.

#### **IV APPROVED CONSERVATION PRACTICES**

Contained in this section is a list of all conservation practice's approved for use in the Monarch Habitat Initiative. The conservation districts shall only use conservation practices listed here unless a special request is approved by the Conservation Commission. In order for a conservation practice special request to be considered the request must be in writing and accompanied by supporting documentation. The special request must be approved by the Conservation Commission prior to the board's approval of Program applications and performance agreements being signed.

Unit cost for these practices is based on Oklahoma NRCS data. In order for a variance to be considered the request must be in writing and accompanied by supporting data compiled by the district. The variance rate must be approved by the Conservation Commission prior to performance agreements being signed.

Below are the conservation practices approved for the Monarch Habitat Initiative.

**Service Sub-Recipient Landowner Agreement**

Landowner Agreement No: MHI-000-000

PARTNERS FOR FISH AND WILDLIFE PROGRAM  
LANDOWNER AGREEMENT

This Landowner Agreement (Agreement), dated \_\_\_\_\_, between landowner \_\_\_\_\_, the \_\_\_\_\_ Conservation District, the Oklahoma Conservation Commission, [Cooperator(s)], and the U.S. Fish and Wildlife Service (Service) is entered into pursuant to authority contained in the Partners for Fish and Wildlife Act (P.L. 109-294), the Fish and Wildlife Coordination Act (16 U.S.C. 661 et seq.) and the Fish and Wildlife Act of 1956 (16 U.S.C. 742a-j), as amended. This project was selected for funding because the Landowner share a common objective with the Service to restore habitat for the benefit of Federal trust species on private lands, and the project supports priority actions identified in the Regional Partners for Fish and Wildlife (Partners) Program Strategic Plan.

\_\_\_\_\_ (Landowner), hereby agrees to participate with the Service in conducting certain wildlife management practices on lands owned or managed in \_\_\_\_\_ County, State of Oklahoma, described as follows: all of, or within, Section \_\_\_\_\_, T \_\_\_\_\_ N-R \_\_\_\_\_.

In signing this Agreement, the Landowner joins as a participant in a wildlife habitat improvement program and grant to the Cooperator and the Service authority to complete the habitat improvement project or the Landowner may personally carry out management activities with financial or material support as described by the \_\_\_\_\_ Conservation District. Any donation of supplies, equipment, or direct payment from the Cooperator to the Landowner for carrying out the habitat improvements is included in the Performance Agreement. The activities conducted pursuant to this Agreement are not to replace, supplement or otherwise contribute to any mitigation or compensation that may be required of the Landowner or Cooperator, or other parties, as a result of any mandated requirements.

The term of this Agreement (also referred to as the habitat retention period) will be completed by \_\_\_\_\_. This Agreement may be modified at any time by mutual written consent of the parties. It may be terminated by either party upon 30 days advance written notice to the other party(ies). However, if the Landowner terminate(s) the Agreement before its expiration, or if the Landowner should materially default on these commitments, then the Landowner agree(s) to reimburse the Cooperator prior to final termination for the prorated costs of all habitat improvements placed on the land through this Agreement, and the Cooperator will work with the Service to determine how those funds will be used. For these purposes, the total cost of the habitat improvements to the United States is agreed to be \$ \_\_\_\_\_.

**Landowner:**

The Landowner or his/her land manager, with legal authority over land management decisions, guarantee ownership of the above-described land and warrants that there are no outstanding rights that interfere with this Landowner Agreement.

The Landowner will notify the Service and other Cooperator of planned or pending changes in ownership. A change of ownership shall not change the terms of this Agreement. The Agreement and terms shall be in effect on the described land for the term of the Agreement.

The Landowner agree(s) to allow access (with advance notice) to the Service and the other cooperating partner to implement the project described in Exhibit A, and to monitor project success.

The Landowner retain(s) all rights to control trespass and retains all responsibility for taxes, assessments, and damage claims.

During the habitat retention period, the landowner must maintain the habitat restored under this award for a period of ten years from the project completion date. This means to leave adequate nesting cover of native warm season grasses/forbs and legumes. This cover will be utilized by ground nesting birds and the monarch butterfly.

At the end of the habitat retention period, the habitat improvement project will become the sole property and complete responsibility of the Landowner. There shall be no obligation to the Service after the term of the Agreement has expired.

The Landowner will be responsible for securing any necessary permits. The landowner must notify Okie Locate to make sure that all pipelines, electric lines, phone lines or other dangerous issues are marked before starting the project. The Landowner and Cooperator agree(s) to identify the Service's contribution to the project during public presentations, reports, or other information published about the project, as appropriate.

The Landowner will not be responsible for replacing wildlife habitat developments that are damaged or destroyed by severe acts of nature].

**Service:**

The Service will work with the Landowner and Cooperator(s) signing this Agreement, throughout the entire Agreement term to support actions needed to ensure that the project is designed and constructed per the Agreement and functions as intended.

The Service, its agents, or assignees will provide advanced notice prior to accessing the Landowner property to implement the project described in the work plan, and to monitor project success.

The Service assumes no liability for damage or injury other than that caused by its own negligence, on the above acreage. The Service does not assume jurisdiction over the premises by this Agreement.

**Spatial Information Sharing:** In accordance with the Privacy Act of 1974, permission must be obtained from the Landowner before any personal information can be released. The only information that can be shared is payment information that is authorized by law. Therefore, Landowner consent is requested to allow for sharing of spatial information about this project solely with conservation cooperators providing technical or financial assistance with the restoration, enhancement or management of fish and wildlife habitat.

I, the Landowner, consent to having spatial information about this project shared with other conservation cooperators

I, the Landowner, do NOT wish to have any spatial information about this project shared with other conservation cooperators

# Blue Thumb Pictorial Report

## August, 2016

### How do you affect your watershed?

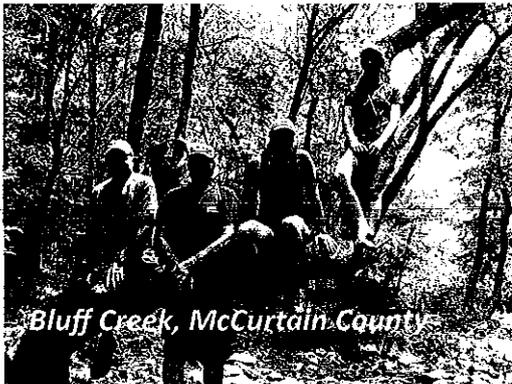

For more information on your watershed, visit: [www.cityoftulsa.org/sos](http://www.cityoftulsa.org/sos)

*Biological collections are taking place at streams across Oklahoma! Three of the five streams below received fish and macroinvertebrate collections AND full habitat assessments. Bishop Creek and Baron Fork were slated only for macroinvertebrate collections this year.*

*In addition, volunteers are performing their dissolved oxygen test as their quality assurance effort.*

*Cheryl was invited by the City of Tulsa and the Tulsa Drillers to throw out the "first pitch" at the game between the Drillers and the Arkansas Naturals on July 21. Cheryl "pitched" for Clean Water!*

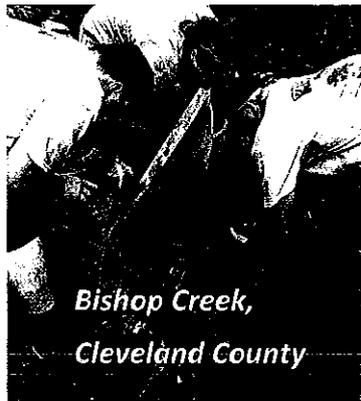

*Bluff Creek, McCurtain County*

*Turkey Creek, Washington County*

*Yashoo Creek, McCurtain County*

*Bishop Creek, Cleveland County*

*Blue Thumb volunteer and retired Oklahoma Conservation Commission staff member Debi Carnott accompanied Cheryl to the Alva Youth Conservation Expo on August 5 where the two provided a simple lesson in soil health. As a "take home" component, their exhibit offered all the tools and materials for participants to create their very own soil painting.*

*Baron Fork, Cherokee County*

*Blue Thumb training for new volunteers was held in Sulphur July 14 & 15. A cheerful new crew of volunteers has come aboard. Even the Water Quality Division's Greg Kloxin showed up for the fun and valuable event!*

*Right: Cheryl, Greg Scott, Pauline Hodges, and Debi Carnott worked with BlueSTEM AgriLearning Center at Fort Reno to offer: Home on the Range—Observations and Connections to the Prairie on July 14. Blue Thumb staff members never stop seeking the best way to help the public find value in the natural world. By creating a recipe that includes ecology, history, and citizenship, the goal is for the final product to be not only informed citizens, but those who care about living a sustainable lifestyle so that earthlings who do not yet exist will have the resources they need to survive and find joy. Earthlings being people, and also our animal neighbors that need healthy woodlands, prairies, and clean water.*

*A "Grand Adventure" stream and lake summer camp for kids (#2 of the summer) was sponsored by Blue Thumb and the Grand River Dam Authority on July 22 and 23 in Langley. Jeri, Kim, and Cheryl worked with GRDA partners to offer the participants lessons on lake and stream water quality, fish, benthic macroinvertebrates, safety, pollutants and pollution prevention, stewardship, and there was tons of fun thrown in as well!*
