Blue Thumb Pictorial Report

October 2013

Education was key for October!

Hundreds of young people were reached with Blue Thumb activities. Numbered photographs are:

- 1: Tulsa State Fair (Cheryl) helping young attendees with "Fish Prints."
- 2: Kim works with kids in a Project Wet Activity at Grove Valley Elementary in Oklahoma County.
- 3: Candice helps at the annual H2Oklahoma natural resource day, this year in Clinton.
- 4: Jeri provides an EnviroScape "pollution prevention" lesson for students at a natural resource day in Okmulgee.

Above—A new Blue Thumb group comes aboard! These chemistry students—and their instructor Steve Hughes—are from Carl Albert State College in Poteau.

Left—Jeri Fleming introduced these Stillwater residents to Blue Thumb on a cold, rainy Saturday in September.

Left—Jacob Neptune and Anna Greenway, volunteers, remove debris from their macroinvertebrate collection so that they can remove a “statistically relevant” portion of the creatures. Known as bug picking, the creatures removed from the Blue Thumb sample will be shipped to a taxonomist for identification.

Jacob and Anna monitor Six Mile Creek in El Reno.

AML EMERGENCY PROGRAM

Methodist Church (Latimer County)

This project was declared an emergency on September 30, 2013. This project addressed a situation involving the sudden collapse of an abandoned underground coal mine creating a subsidence at 209 East Ada Avenue in Wilburton, Oklahoma. The subsidence is at the corner of a parsonage house and had damaged the house and the foundation. There is active erosion directly underneath the failure area taking dirt deeper underground, indicating a mine void underneath. The subsidence creates a dangerous situation with a high probability of harm to the public.

A contract was issued to Garland Drilling Company to do exploratory drilling to see if the subsidence was coal related. No voids or coal beds were found. No further action will be taken on the site.

The contract was completed on October 10, 2013, for \$15,850.

Welcome Back, NRCS Employees!

Continuing Conservation....

All NRCS offices across the country are open, resuming conservation work with farmers and ranchers, and working to address the backlog of requests. NRCS is able to proceed with implementation of several conservation programs, including the Environmental Quality Incentives Program (EQIP) and the Conservation Stewardship Program (CSP). However, authority to enroll new acres in several programs, such as the Wetlands Reserve Program (WRP) and Chesapeake Bay Watershed program, expired on September 30, 2013 due to the expiration of the Farm Bill. Producers should be directed to contact their local USDA Service Center or visit www.nrcs.usda.gov for more information.

Public Television's 'This American Land' to Showcase Agency's Work in Three Episodes

NRCS conservationists help put conservation practices on the ground each day, and that work will make an appearance on the big screen this fall. A public television series – “This American Land” – will showcase NRCS in three episodes of its third season.

The three segments that feature NRCS include:

Critical Aquifer: Water is precious in the West, and producers work diligently to conserve it. Through watering more carefully and investing in soil health, every drop can be put to good use. Meet a few of the conservation heroes in the Ogallala Aquifer region. Check out part of this [episode](#).

Prairie Chickens and Bog Turtles: By using conservation, producers are strengthening their agricultural operations while helping out wildlife in need. Through the Working Lands for Wildlife Initiative, producers play a crucial role in creating and enhancing habitat for at-risk species.

Precious Sierra Water: Conservation is a win-win for the environment and the landowner. See how California producers improve their vineyards, ranches and forests all for the sake of a resource more precious than gold.

The first segment, “Critical Aquifer,” was released Oct. 14. The second segment, “Prairie Chickens and Bog Turtles,” will be released Oct 28, 2013. The last segment, “Precious Sierra Water,” will be released Nov. 19. Check your [local listings](#) for scheduled airdates because they differ by public television station.

ENGINEERING REVIEW

Cottonwood 15 Repair

The Stillwater Watershed Office recently completed emergency repair construction on Cottonwood Creek Site 15 that was decommissioned. An extreme rainfall event spanning the end of May to the first of June led to a high flow event on the earthen spillway portion that was lined with Turf Reinforcement Mat (TRM). The TRM failed during the storm event, and due to the frequency of potential flow events through the structure, an emergency was declared to repair the structure before the crest section breached, which could have led to the release of all the sediment the flood control structure had captured over the past 45 years. The repair included replacing the TRM lined channel with a riprap lined channel that carries the water to the downstream outlet channel of the main rock chute.

Irrigation Pumping Plant Workshop

On August 6 & 7, 2013 Chris Stoner (State Conservation Engineer) and Don Sternitzke (Water Management SPC) attended The Irrigation Pumping Plant Performance Testing Workshop in Stuttgart, Arkansas. The meeting hosted by Arkansas Cooperative Extension Service featured a hands-on workshop that taught participants how to conduct irrigation pumping plant performance tests aimed at: 1) identifying inefficient components, and 2) making cost-effective remedial recommendations.

NRCS Partners with the Euchee Butterfly Farm to Provide Training and Information to Tribes on Butterfly Farming

The Natural Resources Conservation Service (NRCS) partnered with the Oklahoma Tribal Conservation Advisory Council (OTCAC) and the Euchee Butterfly Farm to provide training and information to Tribes and tribal members on how to start a butterfly farm. The butterflies of the Euchee Butterfly Farm are raised on site by tribal members, using ecologically sustainable methods, and sold to butterfly exhibits throughout North America and Europe. The workshop was sponsored by the OTCAC and hosted by the Citizen Pottawatomie Nation on their Tribal Traditions Grounds, in Shawnee, Oklahoma. The workshop was held on Thursday, August 29, 2013, from 9:30 AM to 10:30 AM.

The focus of the workshop was to provide attendees with the information on the importance of Native Butterflies for Native People and Native Pride and how to start a butterfly farm or to create a Native butterfly garden on their traditional grounds. Jane Breckinridge, director of Euchee Butterfly Farm, provided information on how a native butterfly farming offers employment in rural communities, conservation and reintroduction of indigenous plant species to provide host plant for cultivation of native species butterflies, an opportunity to return to native methods of agriculture and provide a sustainable crop that is completely organic and eco-friendly in every possible way. Those attending the workshop were provided a butterfly kit to take home.

Jane Breckinridge and staff members provided butterfly kits to attendees at the Native Butterflies for Native People and Native Pride workshop.

ALFALFA COUNTY – Cherokee Field Service Center

The new Alfalfa CO. Conservation District secretary, Kelly Hellar, staffed the joint ACCD/NRCS booth at the recent Alfalfa County Fair.

ZONE 1 REVIEW cont...

KAY COUNTY – Newkirk Field Service Center

The Kay County Conservation District held its annual Land Judging and Range Plant Identification Contest on September 4, 2013 at a pasture southwest of Newkirk. Students from Tonkawa, Blackwell, and Newkirk Vo-Ag Departments numbering 76 students in all, competed by judging four soil sites and identifying twenty range plants. With all of the rain this year, plants were abundant for the Range Plant ID. The local contest is set up by the Natural Resources Conservation Service (NRCS) and conservation district staff and manned by Earth Team Volunteers. Land judging involves evaluating the texture of topsoil and subsoil, depth of the soil, slope of the land, erosion potential – both water and wind, and permeability of the soil. These criteria help landowners understand basic soil differences, how soil properties affect crop growth, why soils respond differently to management practices, how to select suitable soil and water conservation practices, and ultimately determine land use and treatment. Range plant identification contests help students not only identify plants but also learn their ecological value for beef cattle forage and wildlife habitat, specifically bobwhite quail.

Awards were given for Land Judging Teams and high individuals, Range Plant ID high individuals, and Combined Score for Land Judging and Range Plant ID for both senior and junior divisions.
