- Administrative, technical and land rights assistance to
 - Sequoyah County – Sallisaw 33
 - Logan County – Cottonwood 54
 - Town of Wilburton – Fourche Maline 7M
 - Town of Meeker – Quapaw 15
 - City of Perry – Upper Black Bear 62
 - NFRR – Upper Elk 23D
- Cottonwood 54 – After consulting NRCS engineers the decision was made to move the location of the bore to an area where we will not encounter rock. This option is more economical and less problematic. This will require NRCS to do another geologic investigation in the new bore location to verify that we won't hit rock again. The decision was made to terminate the current contract with Stewart Excavation after they complete work on the auxiliary spillway, fencing the completed work areas and cleaning and stabilizing the work-site. We estimate that it will take between 9 and 12 months to complete the geologic investigation, revise the design for the new bore location and solicit bids for the work. The resulting contact will probably take an additional 6 to 9 months to complete.

VISION: Productive Lands Healthy Environment — MISSION: Helping People Help the Land

Help Extended to Eastern Oklahoma Producers by Partners After the May Floods

On many days and in many ways, NRCS stepped up to help producers following historic flooding in May. NRCS State Conservationist Gary O'Neill and Chad Kacir, Assistant State Conservationist of Field Operations for the East Zone were among those visiting the area several times. NRCS, the Oklahoma Conservation Commission (OCC) and the Oklahoma Department of Agriculture (ODAFF) traveled to eastern Oklahoma to talk with 31 year old Brian Sheffield near Fort Gibson before moving south to help producers in the Spiro area. The power of the water that went through the fields was such that it washed the frame of their mobile home a quarter of mile away.

During the visit, Sheffield was asked what he was hoping to do next. "We are going to try to go with beans," Sheffield said. While the majority of his ground could go to soybeans, there would be some acres not ready for that. NRCS Soil Scientist Jake Boyett said, "The best option is to plant it if you can, but some of that lower area has sand on it. If we've got a window to get some residue down there with the cover crop, we can come up with a mix. In our Cover Crop Initiative through EQIP we can do a simple three or four or five species all the way up to 15, according to Greg Scott (Oklahoma Conservation Commission Soil Scientist) can come up with 15.

It depends on what crop you are going to next on what we want to do, how much residue from the cover crop you can handle with your planter, and what your termination method is going to be. It will get those root channels established and start getting some of that porosity put back into that soil. It will start to build the structure and get some organic matter into it." Sheffield was very appreciative of the input provided by the various agencies. Boyett also talked to other producers that day, walking with them into their fields near Spiro.

NRCS Participates in ECP Information Sessions

The floods of this year are continually on the minds of USDA Oklahoma staff. As a result, the FSA, the NRCS and others offered an Emergency Conservation Program (ECP) Information Session in two eastern Oklahoma communities for producers currently using ECP for Spring 2019 Disasters.

The sessions were held on Aug. 28 in Sallisaw at the Indian Capital Technology Center Health and Admin Seminar Room, and on Aug. 29 in Muskogee at the OSU Extension Meeting Room. Natural disasters can devastate farmland and grazing land and threaten the livelihood of farmers and ranchers who depend on the land on which they live. The ECP can help to lessen this burden, providing assistance in overcoming exceptional damage from storms and severe drought.

Outdoor Classroom

On September 3, 2019 District Conservationist Danielle Metz, Nancy Salyer, and Seth McCool (Lawton) attended the Ft. Sill Apache Tribe Outdoor Classroom in Apache, Ok.

There were approximately 200 kids in 3rd, 4th, and 5th grades from Boone-Apache and Cement schools attending. Danielle illustrated and explained an aquifer by using ice for the rocks, ice cream for the dirt, green coconut for the grass, 7UP for the water and a straw for the well. Each kid was given their own aquifer to enjoy.

Nation to Nation

The Oklahoma Tribal Conservation Advisory Council (OTCAC), the Quapaw Nation and the Oklahoma leadership for the agencies of the U.S. Department of Agriculture (USDA) hosted the "Nation to Nation" Tribal Consultation Meeting and Tours on Aug. 19-20 at the Downstream Resort in Quapaw. All of Oklahoma's sovereign tribes were invited to attend. "This event provides us with an opportunity to engage tribal leaders and administrators from across Oklahoma and helps us identify ways that USDA can better serve tribal governments and tribal members, particularly those that are engaged in farming and/or ranching," said USDA-NRCS Tribal Liaison Dr. Carol Crouch. "We realize that protecting natural resources and preserving the land for future generations is a major priority among American Indian tribes."

Gary O'Neill, NRCS State Conservationist said, "The Nation to Nation consultation event is a great way to share successes and discuss things USDA can improve on in Indian Country. This consultation leads to stronger and more effective partnerships between Tribes in Oklahoma and USDA."

At the Nation to Nation, O'Neill announced the Quapaw Nation as the third Tribal Conservation District in Oklahoma and the 87th Conservation District in Oklahoma.

Altus Irrigation SLT Field Visit

The NRCS State Leadership Team traveled to southwestern Oklahoma to discuss NRCS assistance on irrigation systems. During the two days, the group toured the Altus-Lugert area with Tom Buchanan, looked at the main canal siphon, visited main canal diversion gates, looked at canal check and lateral turnouts and visited irrigated fields. The group had discussions about NRCS assistance on irrigation systems.

In addition to stopping by the NRCS Field Office in Altus, the group visited Matt and Kellie Muller's farm near Martha to talk about irrigation systems and discuss NRCS programs.

Finalists Selected for Oklahoma Leopold Conservation Award

Two finalists have been selected for the prestigious 2019 Oklahoma Leopold Conservation Award. Given in honor of renowned conservationist Aldo Leopold, the award recognizes farmers, ranchers and foresters who inspire others with their dedication to land, water and wildlife habitat management on private, working land. In Oklahoma the \$10,000 award is presented annually by Sand County Foundation, Oklahoma Cattlemen's Association, Noble Research Institute, Oklahoma Farm Bureau Foundation for Agriculture, ITC Holdings Corp., Oklahoma Conservation Commission, and the U.S. Department of Agriculture's Natural Resources Conservation Service. This year's recipient will be revealed on February 24, 2020 at the Oklahoma Association of Conservation Districts' Legislative Evening in Oklahoma City. Award applications were reviewed by an independent panel of agricultural and conservation leaders.

The Finalists are:

Chuck and Ruth Coffey of Murray County:

The Coffey's managed rotational grazing plan for their beef cattle, has increased perennial grasses while reducing soil erosion. They host tours promoting grazing management and the importance of prescribed fires to promote biodiversity. Over the past decade, 20 solar wells, above ground water storage, and piping systems were installed to ensure livestock and wildlife have reliable water. Chuck serves as chairman of the National Cattlemen's Beef Board.

Victor Ranch of Ottawa County:

Grant and Donna Victor raise beef cattle and grow wheat, oats, soybeans, corn and pecans with their three sons. Their early adoption of no-till on their cropland earned them the National Soil and Water Conservation Award by the National Endowment for Soil and Water Conservation in 1986. They converted 600 acres of highly erodible cropland to native pasture. Re-establishing pecan groves to their ranch has provided an additional income stream, and quality wildlife habitat. Grant Victor is a director of the Ottawa County Conservation District.

Working Effectively With American Indian Tribes

Dr. Carol Crouch of NRCS led the Working Effectively with American Indian Tribes training, hosted by the Chickasaw Nation, Aug. 12-16, at the Chickasaw Nation Retreat & Conference Center, Sulphur. Participants came from Oklahoma, Nebraska and Arkansas. There were numerous topics covered, including: "Tribal Laws & Policies," "Sharing our Culture," "Building Relationships & NRCS Guides for Success," "Tribal Success Stories," and many other great topics.

Soil Health Education Important Within the Fence Lines and the City Limits

A passion for appreciating soil health can be measured in many ways. For some that commitment comes in acres and for others it is found in terms of square feet. There are those applying conservation practices to their pastures and those doing so in their front or backyards or on the patio. For some it's their living and others it's their hobby. That's where the Soil Health Education resources of the Oklahoma Conservation Commission (OCC) and the Natural Resources Conservation Service (NRCS) come in.

Take for example two programs over a recent five-day stretch. The first came on a weekend with more than 100 producers gathered for about six hours at the Pontotoc County Technology Center in Ada for a "Coffee Shop Talk, Grazing For Profits" free workshop. The topics included Grazing 365 and the use of Cover Crops; Reducing your costs, and Resilience.

The latter was held on a mid-week morning as more than 80 people attended a Soil Health 201 workshop for about three hours at the Will Rogers Garden Exhibition Center Hall in Oklahoma City. During this free seminar, participants learned how to interpret soil test results, select plants that promote soil health, and much more. Below is a picture of Steve Alspach, NRCS State Soil Scientist and Greg Scott, a part-time Soil Scientist with OCC.

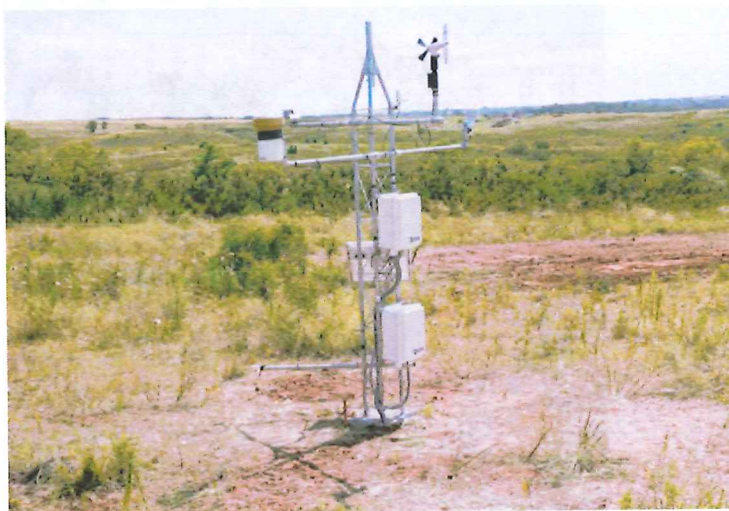

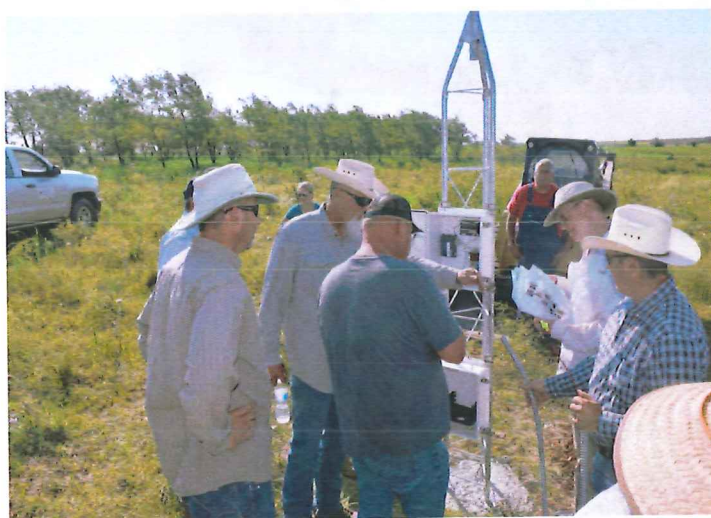

TSCAN Installation Begins With Cheyenne-Arapaho in Far Western Oklahoma

The first of three Tribal Soil Climate Analysis Network (TSCAN) units scheduled for Oklahoma was installed in August only about five miles from the Oklahoma-Texas state line near Reydon in Roger Mills County. "We are on the far western side of our Cheyenne-Arapaho original Reservation, on an allotment called the Ora Woods Allotment," Nathan Hart, business director for the Cheyenne and Arapaho Tribes said of the tribe's farthest west property in Oklahoma. "This combines both our heritage and the future. We do have a focus on our youth. We understand the importance of Sciences and Mathematics. That's what we want to encourage our youth to move towards. So with this particular project we want to get our youth involved so they understand what we're doing out here with all the data that is being collected and how that is being used. Maybe it will encourage some of our youth to move into these various fields in an area with the weather or soil science."

Hart also said, "We are very interested number one in soil health. We believe that everything starts with the soils and if we take care of the soils, we'll get good vegetation, good plant material which translates to the animals and of course the animals provide food for us. So our philosophy is everything starts in the soil. Having the ability to monitor your soils and particularly by precipitation, everything else in the soils is vitally important to us."

TSCAN was initiated in 2017 to provide improved soil climate data to tribes in underserved locations around the U.S. Goals of the project are to provide localized soil and climate data to selected tribes for agricultural and forestry management decisions, strengthen tribal outreach to support production management as well as STEM (Science Technology Engineering and Math) education, and connect tribes with local entities (USDA NRCS), Bureau of Indian Affairs, USDA Climate Hubs, extension, universities and the National Oceanic and Atmospheric Administration to build and strengthen partnerships and alliances both locally and nationally.

These projects have many benefits. For example, during installation of the unit at the site on Cheyenne-Arapaho land, NRCS took the opportunity to dig a T-shaped trench. The purpose was to take a closer, literally deeper, look at this land and then be able to save this along with information about other areas, near and far. "That's our soil characterization sampling for that particular series," said Steve Alspach, Oklahoma NRCS State Soil Scientist. "We describe the profile and then we sampled, bulk sampled, which they will do the chemical/physical tests on and then we did some clods that we wrap in liquid Saran that they can do bulk density tests on. Those will be shipped to the lab and ran through within the next year or so. We try to do as much sampling as we can on each series so that we have a data set to give ranges and texture."

NACD South Central Region Meeting

Natural Resources Conservation Service (NRCS) Associate Chief, Kevin Norton, an Oklahoma native, spoke to those gathered in Oklahoma for the National Association of Conservation Districts (NACD) South Central Region Meeting in Thackerville, Okla. As Associate Chief, Kevin Norton is responsible for NRCS conservation activities and programs.

Gary O'Neill, Oklahoma NRCS State Conservationist, Trey Lam, Executive Director of the Oklahoma Conservation Commission (OCC), and Larry Wright, President of the Oklahoma Association of Conservation Districts (OACD) presented at the opening session on the topic of Conservation Partnership Successes in Oklahoma. O'Neill spoke about emergency response in wildfires and floods, the National Water Quality Initiative and shared staff with OCC and Conservation Districts. Lam spoke on watersheds, the state cost share program and water quality delisting. Wright discussed demonstration farms through RCPP, the Leadership class for directors, and the CARE project

Soil Health Initiative

The 2019 NACD South Central Region Meeting included a session titled "Soil Health in Oklahoma: Facilitating Change." Topics included the beginning of these efforts, awareness, training, and carrying through to the success realized by producers and seen in the recently released U.S. Census of Agriculture. The final day of the 2019 NACD South Central Region Meeting featured sessions titled "Moving Forward with Crop Rotations and Cover Crops ... Maximizing Rainfall Capture" and "I'm a Recovering Tillage Addict."

Jimmy Emmons Regional Coordinator, FPAC-Business Center covered topics, including, "No till with cover crops, with livestock." In listing the pros, Emmons noted: Living plant 24/7 feeding the microbes; Soil becomes resilient; Higher biological population; Increased formation of soil aggregates; Improved infiltration rate; Decreased erosion and runoff; Less compaction; Benefits from manure and urine; Less need for commercial inputs; Additional income integrating livestock; Increased pore space; Increased armor on the soil, and Mimics nature.

Civil Rights

Over the course of fiscal year 2019 Nicholas Jones was instrumental in the delivery of 2 larger civil rights activities that went above and beyond his normal role. First, he actively participated in the development of a National Fridays on the Farm story, published on Feb. 22, 2019, titled "For the Love of Farms." The story features Patricia Crenshaw, an African American woman who Nicholas has developed a working relationship where he has provided technical and financial assistance for her operation since he was a D.C. Secondly, Nicholas facilitated an opportunity for a summer student intern to interview a landowner, who then created a video about Oklahoma grazing lands.

Within this fiscal year the employees of the Team 20 office have worked to reach many folks from all types of backgrounds to provide outreach and educational services to them. Through activities like their Outdoor Classroom they were able to work with 500 students, the Team 20 Farm Show where they were able to work with approximately 250 individuals, the Team 20 Water Fest where they worked with 500 kids on water quality, the Muskogee Creek Nation where they assisted another office in reaching approximately 450 producers providing them with information about the USDA-NRCS and what we do.
