Conclusion of Law

6. Title 27A of the Oklahoma Statutes, Sections 3-1-101 and following provide for the overall powers and duties of the Oklahoma Conservation Commission and the local conservation districts. Section 3-2-106 (A) (18) (a) grants power to the Commission, by Administrative Order, to transfer lands from one district established under the provisions of the Conservation District Act to another district. The statute requires that the boards of each requesting district approve the reorganization proposal by a majority vote of the members of each of the boards involved. Furthermore, the boards of both districts must submit in writing a consolidation or transfer plan to the Commission for its approval of the proposed reorganization.

7. In a regularly scheduled board meeting held on November 6, 2017, the Oklahoma Conservation Commission examined and considered the minutes, facts, and issues regarding the *Transfer of Conservation District Lands Plan* between these two districts. Upon review of the documents represented and the questioning of Commission staff involved in assisting in the transfer effort, the Commission finds that the statutory requirements have been met regarding the request for reorganization, and that the transfer of real property, operations, powers, and duties of these two districts as set out in the *Transfer of Conservation District Lands Plan* will further the interests of conservation of renewable natural resources in Oklahoma.

8. Accordingly, the Oklahoma Conservation Commission approves the *Transfer of Conservation District Lands Plan* to transfer land, as set out in the Conservation Commission minutes of November 6, 2017, and as approved by the Kingfisher County Conservation District and the Cimarron Valley Conservation District. Effective on the close of business on December 30,

2017, the Cimarron Valley Conservation District shall transfer all of its lands, interests in lands, operations, powers, and duties, lying within Kingfisher County to the Kingfisher County Conservation District. The Kingfisher County Conservation District shall assume its new operations, powers, and duties, including district cooperator agreements and conservation plans, if any, for all the lands and interest in lands being transferred to it by the Cimarron Valley Conservation District as of the start of business on December 31, 2017. Furthermore the Kingfisher County Conservation District shall thereafter operate and exist on their new boundary lines as shown in MAP B.

9. The Oklahoma Conservation Commission finds, approves, and recognizes that all real property, interests in property, operations, powers, and duties, including existing district cooperator agreements and conservation plans, if any, on the above-described lands that transfer from the Cimarron Valley Conservation District shall become the responsibility of the Kingfisher County Conservation District as of December 31, 2017.

DONE AND PERFORMED THIS 6th DAY OF NOVEMBER, 2017, REGARDING THE NEW DISTRICT BOUNDARY OF THE KINGFISHER COUNTY CONSERVATION DISTRICT AND THE REVISED NEW BOUNDARY OF THE CIMARRON VALLEY CONSERVATION DISTRICT EFFECTIVE ON THE 31ST DAY OF DECEMBER, 2017, BY ORDER OF THE CONSERVATION COMMISSION OF THE STATE OF OKLAHOMA.

OCC has a pile of miscellaneous items that they will need to decide what is to be done with them, this includes cameras, an old projector with speakers, slide projectors, etc... Blaine County CD would like the OCC computer if possible. Need to: call the company to pick up the copier/printer; cancel PO Box at the end of December and forward to BCCD; the big equipment(drills) are OCC's and must be auctioned if Blaine County CD does not want this equipment; follow-up on District audit; find out retention for minutes and audits; talk with landowner about extending rent and utilities through the end of November; and get NRCS to come and get the files they are wanting.

OKMaps

Oklahoma's Open Source Clearinghouse

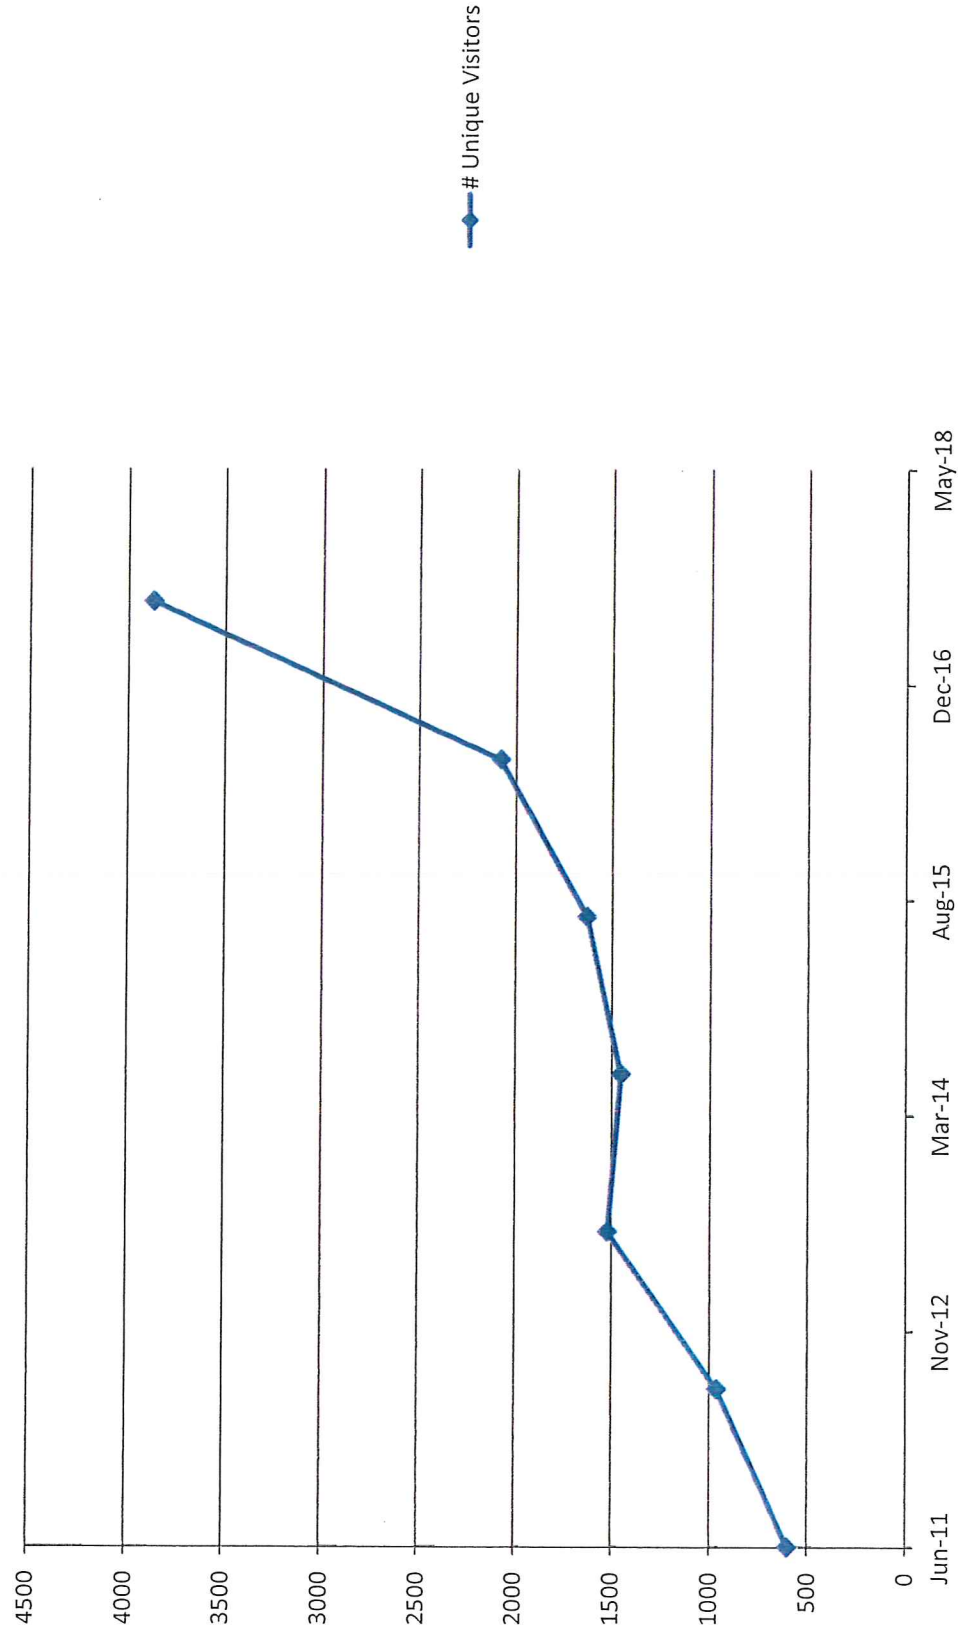

For Geospatial Data

Visitors are logged by network address (ie, IP address). A unique visitor is a single IP address that is counted only once in the time span of one month no matter how many times that IP address visits the OKMaps site. Typically users that are located on an office network (like the OCC and other state agencies and most businesses) are seen on the internet as a single IP address. Therefore if there are multiple OKMaps users on a network that visit OKMaps multiple times in a month they will count as only one unique visitor.

Unique Visitors x FY

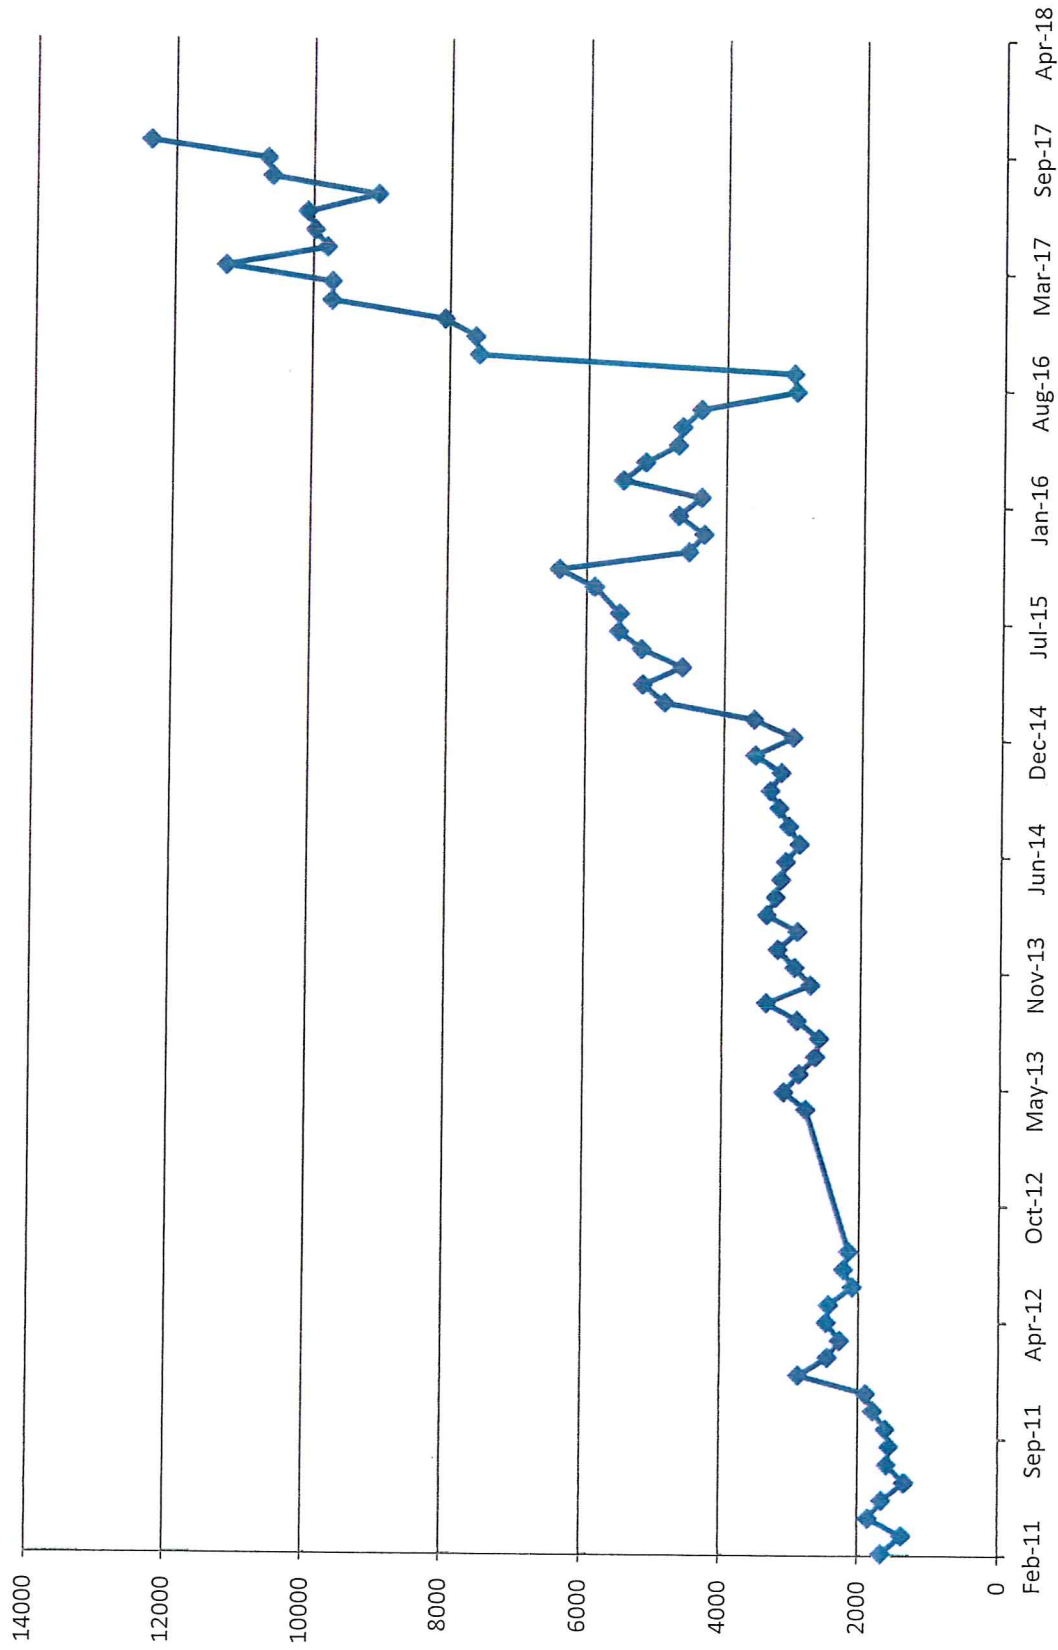

During FY'15 in August, 2014 OKMaps began serving out LIDAR data which resulted in increased usage. In FY'17 in August, 2016 OKMaps began serving out parcel data through the WMS service. As you can see usage has seen a big increase.

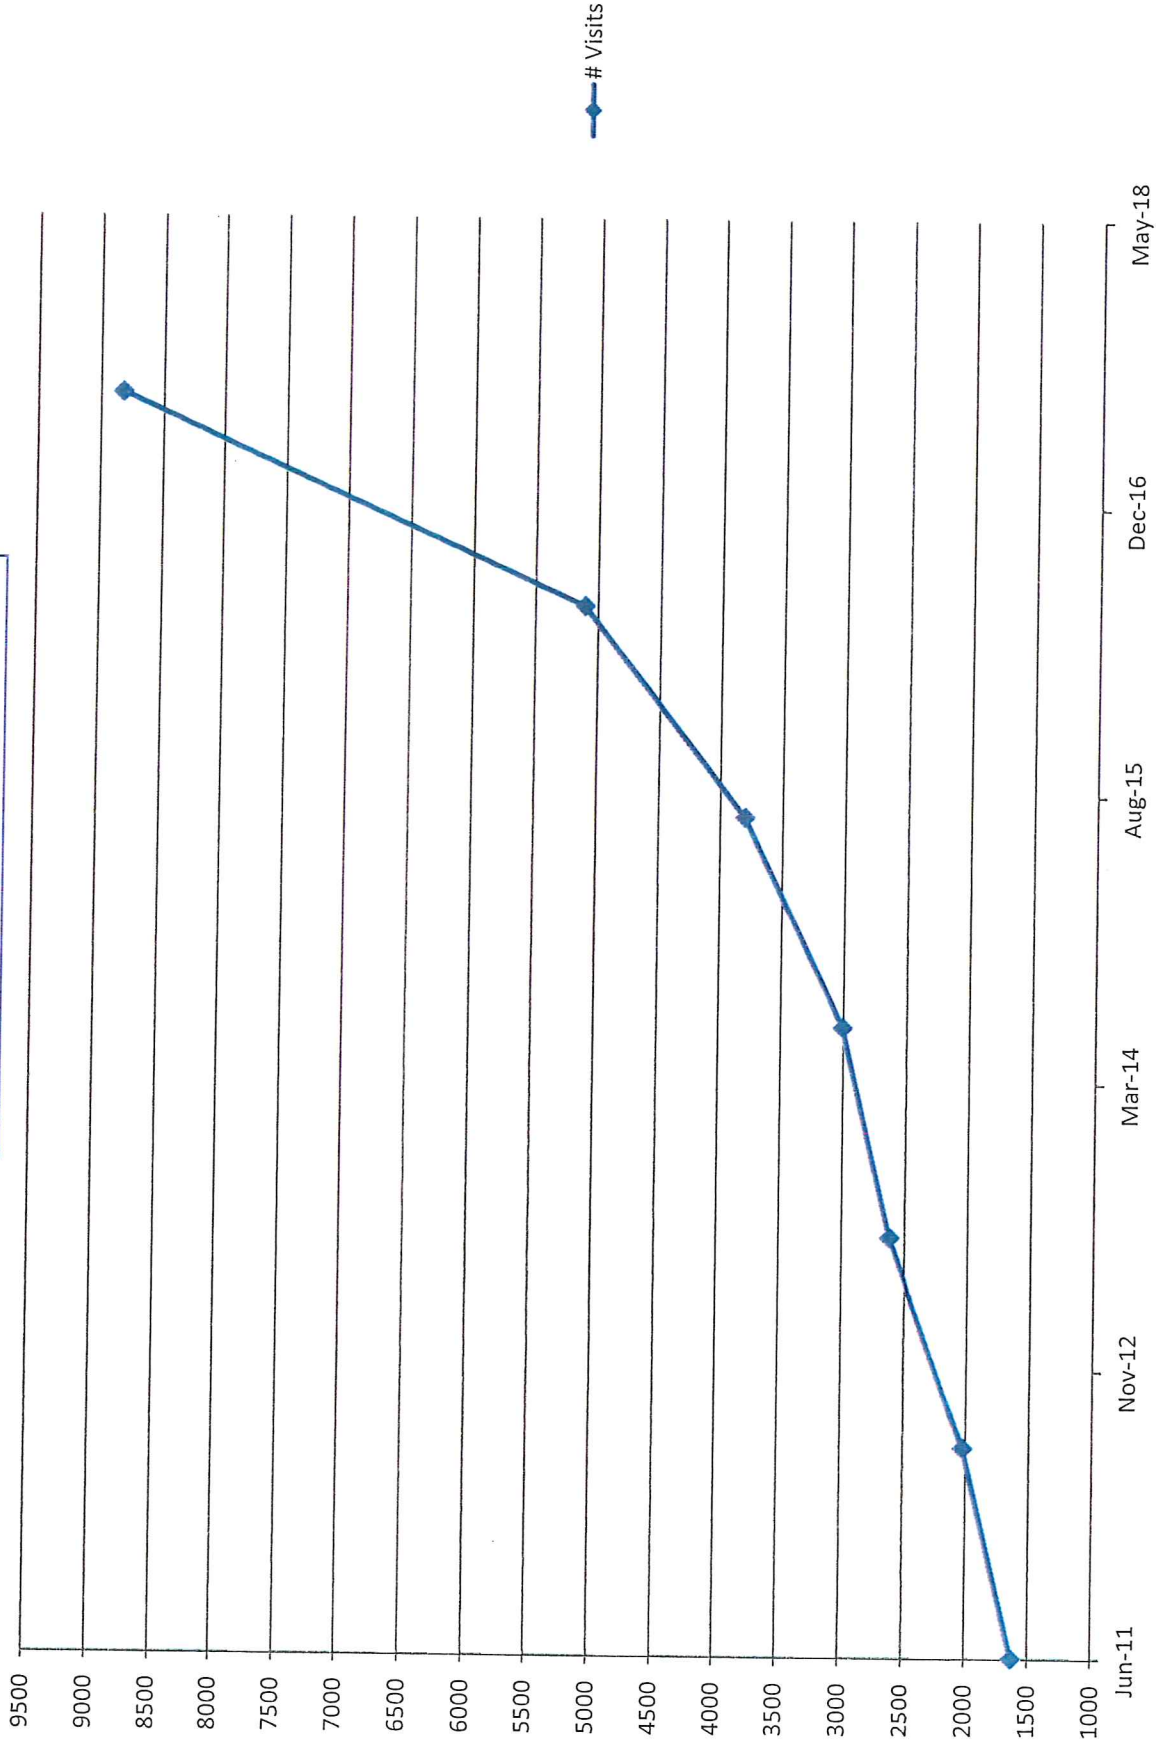

OKMaps

Number of Visits per Month

The number of visits per month counts the number of times a given IP address visits the OKMaps site with visits that are at least one hour apart.

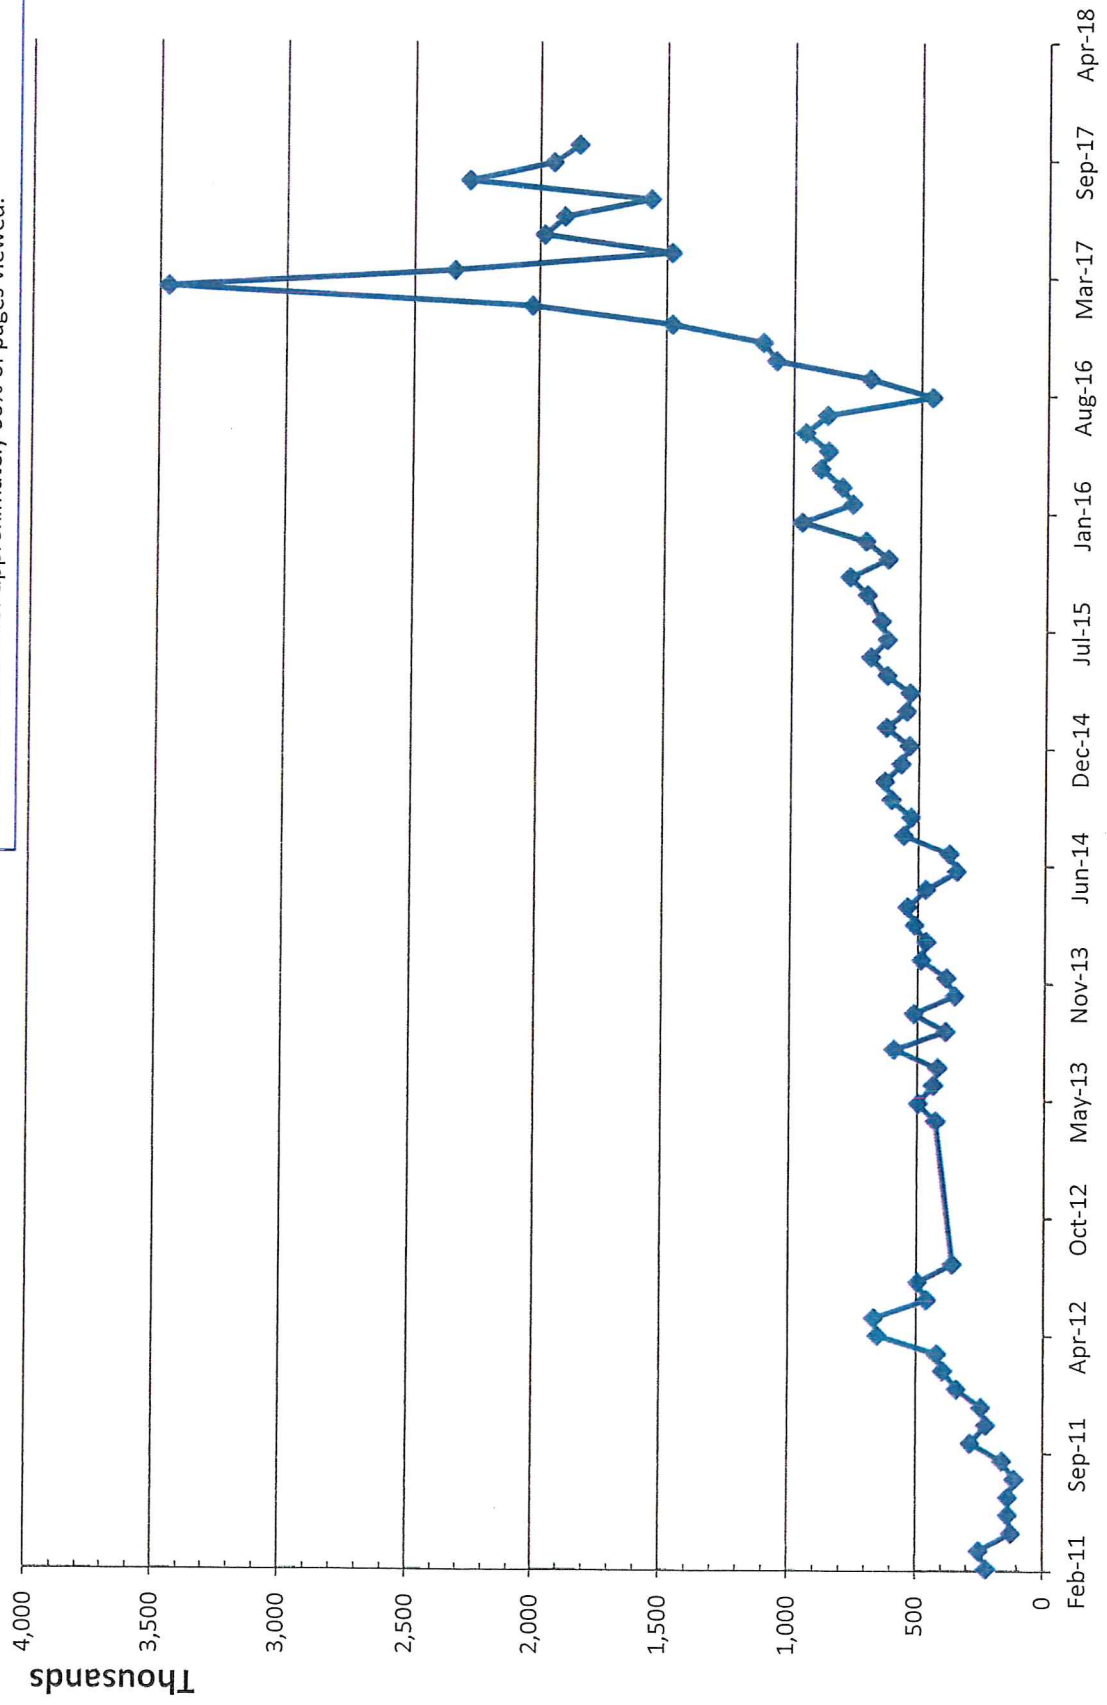

OKMaps

Number of Pages Viewed per Month

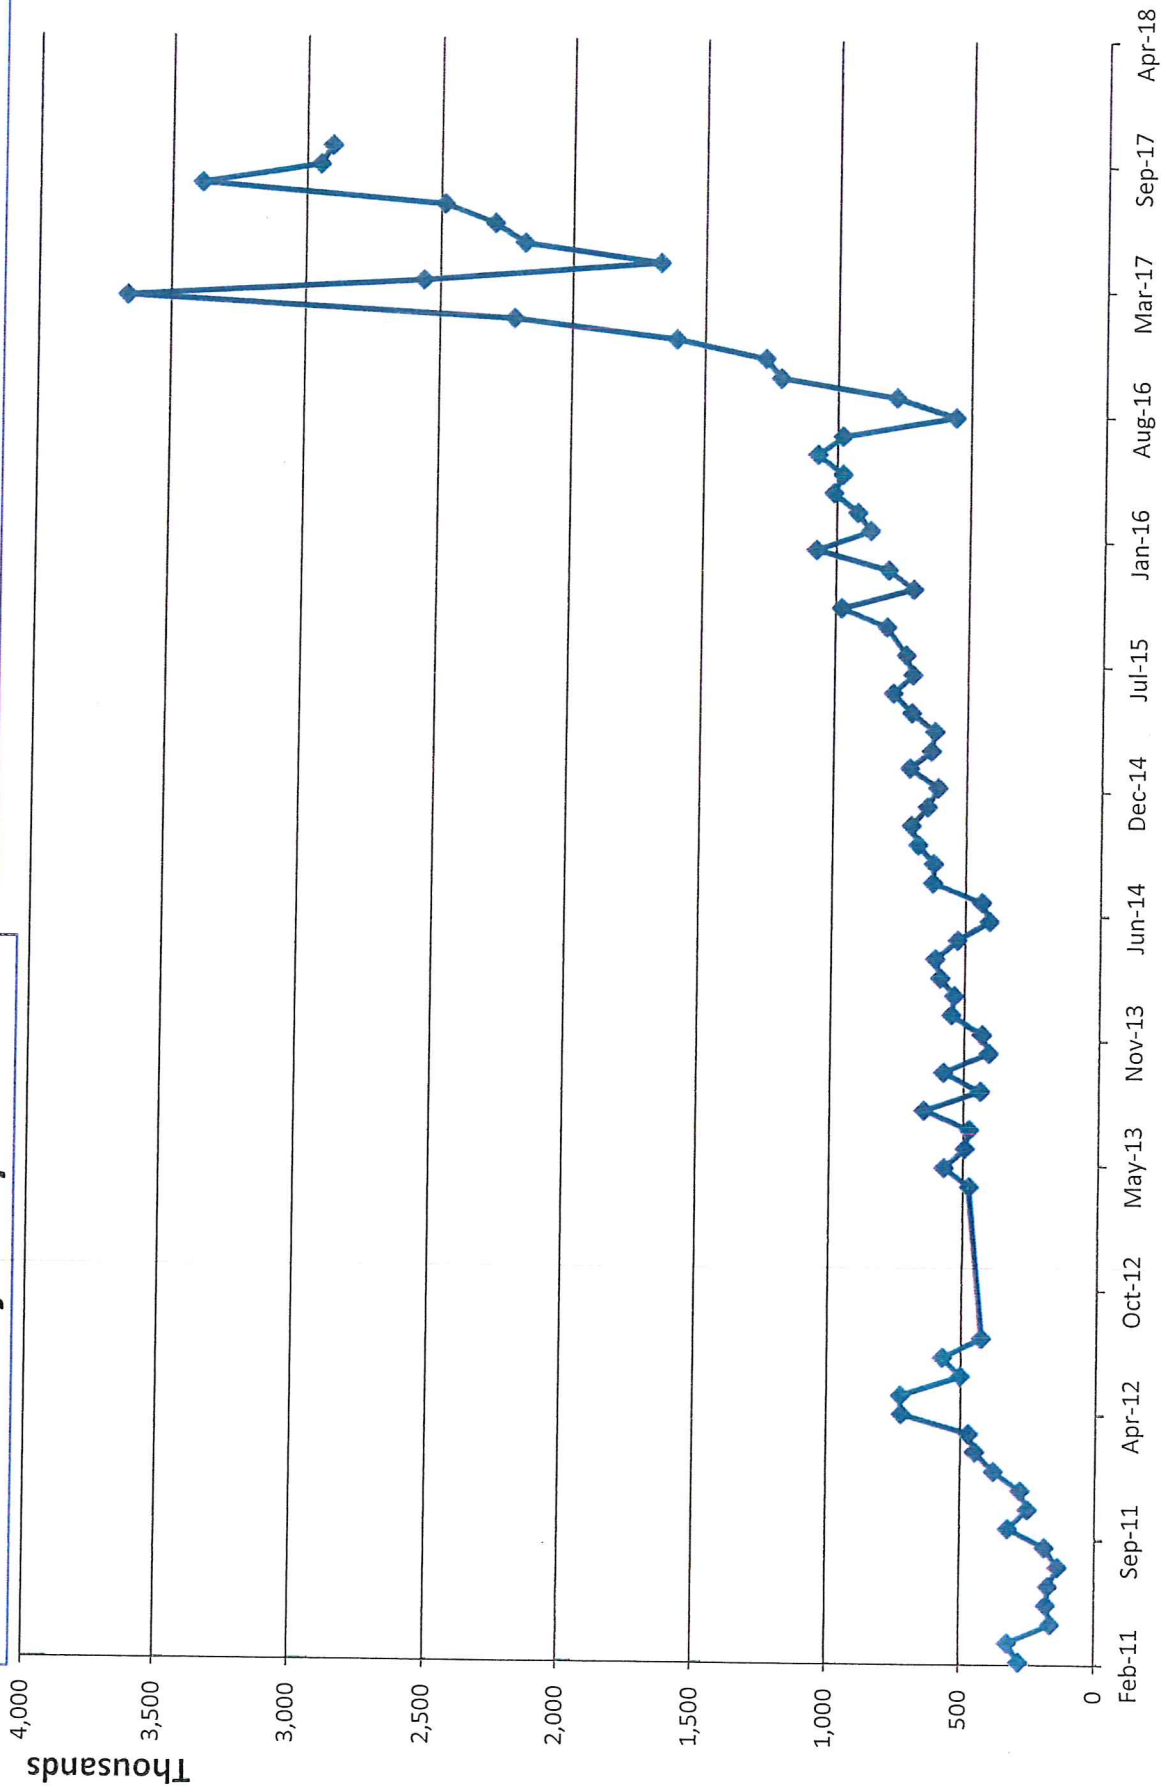

Pages viewed includes HTML, PHP and ASP pages but not images or pages needed to load files such as js, css, etc. Also, pages viewed through the OKMaps WMS service are included in the count. In October, 2017 the WMS service accounted for approximately 60% of pages viewed.

OKMaps

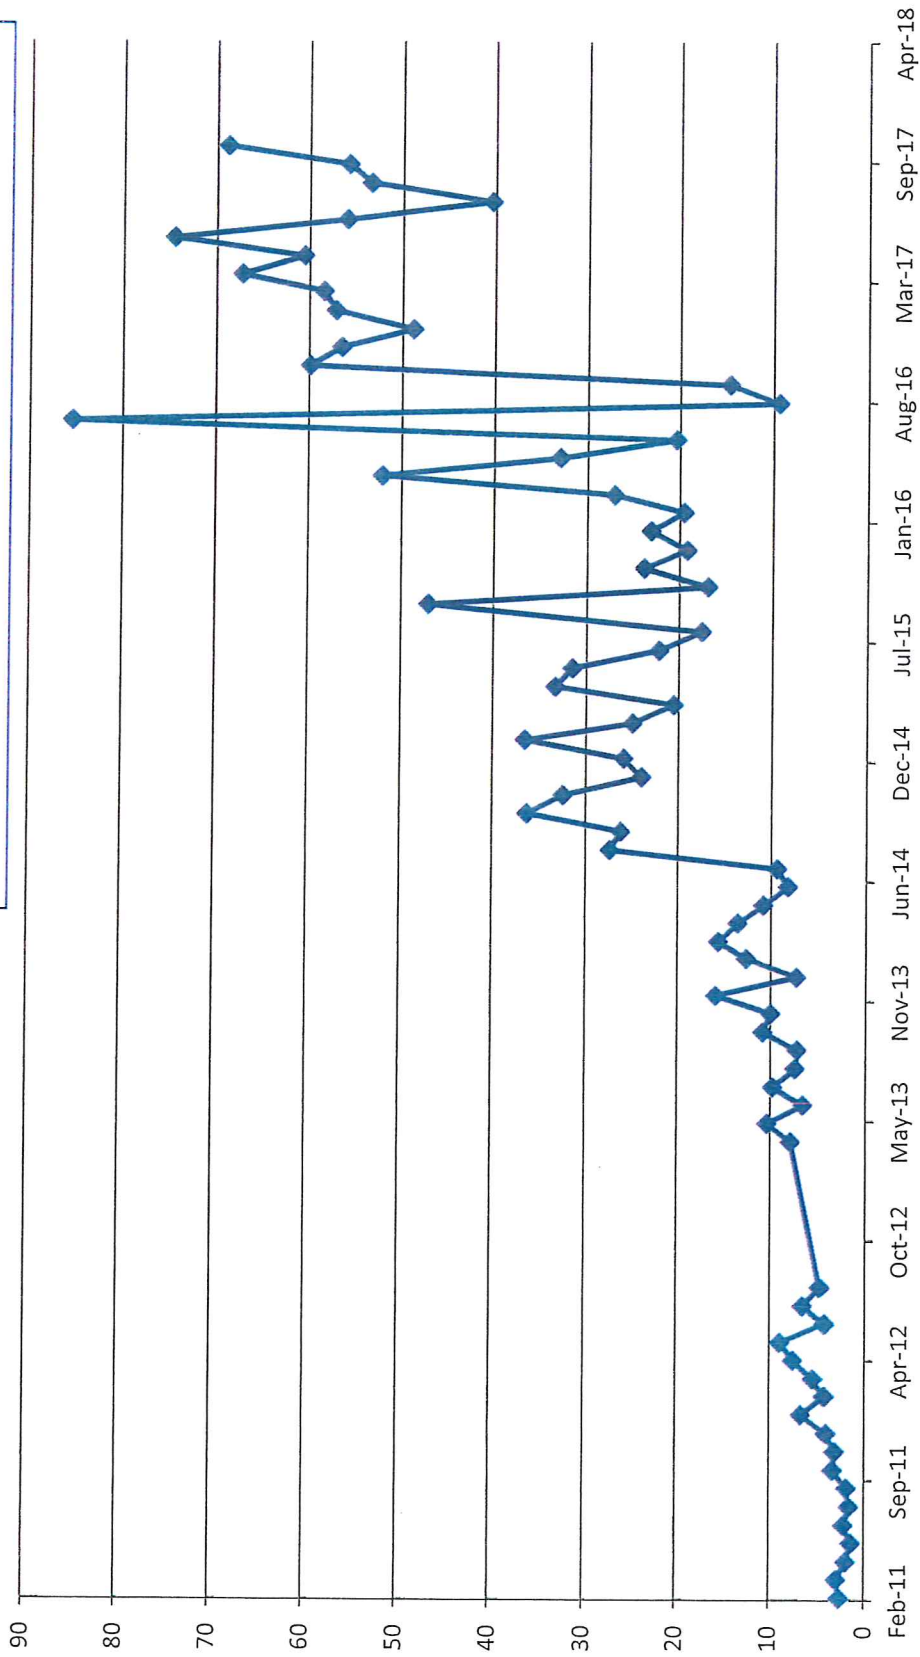

Total Number of Hits per Month

Total Hits include pages viewed and files requested by the server. Viewing a page can result in more than one hit. Therefore the number of pages viewed is usually a better metric than the number of hits.

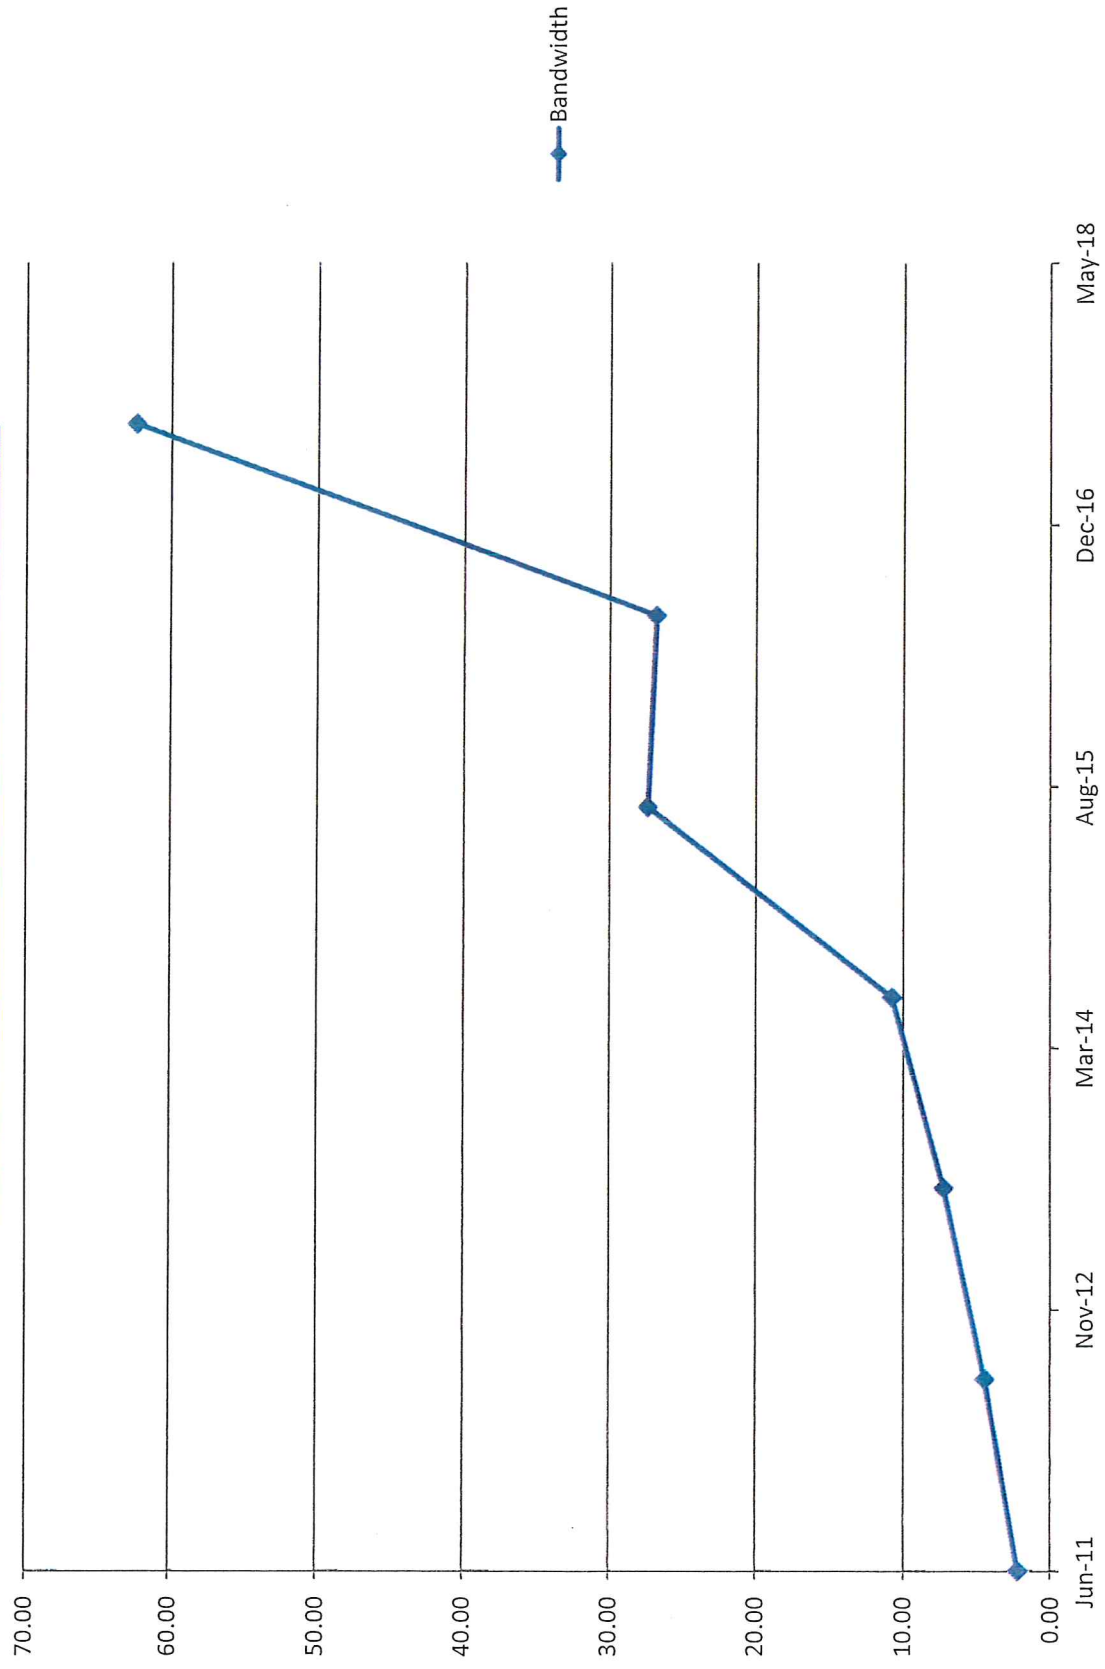

OKMaps
*Monthly Volume of Data
Downloaded (Bandwidth) GB*

This is the number of bytes of pages, images and files downloaded through the OKMaps web site. OKMaps uses an Open Source log analyzer, AWSTATS, to filter the web traffic on the site. The filter removes from this statistic any data downloads attributed to robots and spiders. For example, in October, 2017 there was 69 GB of viewed traffic and another 52 GB of non-viewed traffic attributed to these web crawlers, robots and spiders.
