**STATE GUIDELINES
FOR THE
CONSERVATION COST-SHARE PROGRAM**

PROGRAM YEAR 10

Program Year Begins: December 1, 2008
Program Year Ends: June 30, 2010

Allocation Period Begins: December 1, 2008
Allocation Period Ends: June 30, 2009

Oklahoma Conservation Commission
in cooperation with
Oklahoma's 88 Conservation Districts

Approved by the Conservation Commission on _____

1. GENERAL

The Oklahoma Conservation Commission hereby declares that the following problems are having a detrimental affect on the renewable natural resources of our state:

Oklahoma's water and soil resources are an important foundation of the state's economic infrastructure. Natural climatic events as well as human activity are impacting these two natural resources. As long as farmers and ranchers produce food from the land to feed the world and the wind blows and the rain falls, we will continue to see impacts on soil and water. Our task as stewards of these natural resources is to minimize these impacts. Protecting these vital natural resources is paramount in preserving the state's economic future. In order to accomplish this goal, the Conservation Commission hereby establishes the following goals and objectives to address these problems affecting our renewable natural resources:

Make cost-share funds available to conservation districts so that they can implement cost-share practices which will protect our soil and water natural resources.

The Conservation Commission herein establishes the complete list and description of the conservation Cost-Share Program policies and conservation practices approved for use by the conservation districts during program Year 10. See Section II for the approved list of conservation practices with their respective range of cost-share rates for each of the Conservation Cost-Share Program initiatives. State cost-share average costs (unit cost) are based on Oklahoma Natural Resources Conservation Service (NRCS) data.

Any exceptions from these established Conservation Cost-Share Program policies and guidelines shall be approved by the Conservation Commission.

II. ALLOCATION OF FUNDS

A. Locally Led Conservation Initiative

The Conservation Commission allocates the \$1,500,000 FY 2009 appropriation and \$203,000 of the un-obligated balance from previous program years for a total of \$1,703,000 to the Conservation Cost-Share Fund for the purposes of providing cost-share payments to eligible participants for implementing approved cost-share conservation practices.

B. Conservation District Allocation

The amount of funds allocated to each conservation district appears in addendum A. These funds will be available to conservation districts on December 1, 2008.

D. Reserve Fund

The Conservation Commission allocates \$166,716 of the unobligated balance from previous program years to the Conservation Cost-Share Reserve Fund for the purposes of meeting contingencies that occur in conservation districts or within the Conservation Commission for the current program year.

III. POLICIES

A. Allocation Period

The allocation period shall start December 1, 2008 and end June 30, 2009. Any funds allocated to districts and not obligated during the allocation period for program year 10 will be released by the district and made available for reallocation by the Conservation Commission. Funds become obligated to a participant after approval of the application by the board and a performance agreement has been signed and dated by the district board and the participant.

B. Authorized/Designated Representatives

The district board must designate an authorized district representative. This person can sign all forms. The authorized district representative must be a district board member. It cannot be a district employee.

The district must designate a technical representative. The designated technical representative will assist in developing conservation plans and determining the need for conservation practices. The representative will also be responsible for design and layout of approved conservation practices, determining compliance with approved standards and specifications, and certifying conservation practice quantities and completion of conservation practices.

C. Conservation Practices

Each district board may select any of the approved cost-share conservation practices within the Locally Led Conservation Initiative for inclusion in the district's local guidelines. The selection should be based on which practices will best address the district's highest priority problems affecting renewable natural resources.

Cost-share practices shall be implemented according to NRCS standards and specifications. In the event NRCS standards and specifications do not exist, conservation practices must meet Conservation Commission approved standards and specifications.

D. Average Costs

State average cost (unit cost) for these practices is based on Oklahoma NRCS data. In order for a variance to be considered the request must be in writing and accompanied by supporting data compiled by the district. The variance rate must be approved by the Conservation Commission prior to the board's approval of Program applications and performance agreements being signed.

E. Cost-Share Payments

The minimum cost-share payment amount that shall be made to any participant from these funds is \$100. The maximum cost-share payment amount that shall be made to any participant from these funds is \$5,000.

F. Cost-Share Rate

The maximum cost-share rate for these practices is 75%. District boards may choose to set cost-share rate less than the specified rate.

G. Eligibility

Applicants for the Conservation Cost-Share Program must be a district cooperator with a conservation plan. The applicant must certify that they own or operate at least 20 acres of land from which more than \$1,000 of soil-dependent products are sold annually.

Conservation Commissioners, Conservation Commission staff, conservation district employees or the spouses of any of these people shall not be eligible to participate in the Conservation Cost-Share Program.

On November 1, 1999 conservation district directors became eligible to participate in the Conservation Cost-Share Program. Due to the limited amount of funds available for program Year 10 individual directors should give careful consideration to public perception when making their decision to participate in the Program. If the local board decides that board members can apply and board members choose to apply for program Year 8 the guidelines below must be followed.

1. Individual district board members applying cannot discuss any element of the Cost-Share Program including but not limited to practices, rates, average costs, selection criteria, application approval/disapprovals, cost-share payments, and extensions.
2. Individual district board members applying for the Cost-Share Program must abstain from voting on all elements of the Program.
3. Individual district board members cannot use their position as a conservation district board member to improve or elevate their individual chances of becoming a successful applicant.

H. Agreements

All program Year 10 performance agreements must be signed and dated by the district board and participant on or before June 30, 2009. All program year 10 performance agreements must be completed and the check in the hand of the participant on or before June 30, 2010. Installation of conservation practices can not begin until an effective performance agreement is in place. A performance agreement becomes effective on the last date of signature. Each participant should have only one performance agreement.

Each participant is required to sign a maintenance agreement. Completion of the maintenance agreement and signature of the participant are required prior to the

disbursement of the cost-share payment.

IV APPROVED CONSERVATION PRACTICES

Contained in this section is a list of all conservation practice approved for use in the program Year 10 Locally Led Conservation Initiative. The conservation district shall only use conservation practices listed here unless a special request is approved by the Conservation Commission. In order for a conservation practice special request to be considered the request must be in writing and accompanied by supporting documentation. The special request must be approved by the Conservation Commission prior to the board's approval of Program applications and performance agreements being signed.

State average cost (unit cost) for these practices is based on Oklahoma NRCS data. In order for a variance to be considered the request must be in writing and accompanied by supporting data compiled by the district. The variance rate must be approved by the Conservation Commission prior to performance agreements being signed.

Below are the conservation practices approved for program year 10.

314 - Brush Management

Definition: Removal, reduction, or manipulation of non-herbaceous plants.

Purpose: This practice may be applied as part of a conservation management system to accomplish one or more of the following purposes:

- Restore natural plant community balance.
- Create the desired plant community.
- Reduce competition for space, moisture, and sunlight between desired and unwanted plants.
- Manage noxious woody plants.
- Restore desired vegetative cover to protect soils, control erosion, reduce sediment, improve water quality and enhance stream flow.
- Maintain or enhance wildlife habitat including that associated with threatened and endangered species.
- Improve forage accessibility, quality and quantity for livestock.
- Protect life and property from wildfire hazards.
- Improve visibility and access for handling livestock.

NOTE: For the following species only - eastern red cedar (*juniperus virginiana*), ashe juniper (*J. ashei*), redberry juniper (*J. pinchotii*), oneseed juniper (*J. monosperma*), and rocky mountain redcedar (*J. scopulorum*).

342 - Critical Area Planting

Definition: Planting vegetation on highly erodible or critically eroding areas.

Purpose: To stabilize the soil, reduce damage from sediment and runoff to downstream areas.

362 ¥ Diversion (new structures only)

Definition: A channel constructed across the slope with a supporting ridge on the lower side.

Purpose: To divert excess water from one area for use or safe disposal in other areas.

378 ¥ Pond (new structures only)

Definition: A water impoundment made by constructing a dam or an embankment or by excavating a pit or dugout.

Purpose: To maintain or improve water quality.

382 - Fencing

Definition: Enclosing or dividing an area of land with a suitable permanent structure that acts as a barrier to livestock, big game, or people. (Does not include temporary fences).

Purpose: Exclude livestock or big game permanently from areas that should be protected from grazing (vegetated and seeded areas, tree planting, wildlife areas, recreational areas, brush management areas, structural measures, cropland or other areas requiring special treatment).

NOTE: This practice is to be used only in conjunction with the Pond (378) or as cross fencing for grazing management.

410 - Grade Stabilization Structure

Definition: A structure used to control the grade and head cutting in natural or artificial channels.

Purpose: To stabilize the grade and control erosion in natural or artificial channels, to prevent the formation or advance of gullies, and to enhance environmental quality and reduce pollution hazards.

412 ¥ Grassed Waterway (new structures only)

Definition: A natural or constructed channel that is shaped or graded to required dimensions and established in suitable vegetation for the stable conveyance of runoff.

Purpose: To convey runoff from terraces, diversions, or other water concentrations without causing erosion or flooding and to improve water quality.

512 - Pasture and Hay Planting

Definition: Establishing native or introduced forage species.

Purpose: Reduce soil erosion by wind and/or water.

516 - Pipeline

Definition: Pipeline installed for conveying water for livestock or for recreation.

Purpose: To convey water from a source of supply to points of use.

NOTE: This practice is to be used in conjunction with the Watering Facility (614) practice.

550 - Range Planting

Definition: Establishing adapted plants by seeding on native grazing land.

Purpose: To prevent excessive soil and water loss and improve water quality.

590 ¥ Nutrient Management

Definition: Managing the amount, form, placement, and timing of applications of plant nutrients.

Purpose: To supply plant nutrients for optimum forage and crop yields, minimize entry of nutrients to surface and groundwater, and to maintain or improve chemical, physical and biological condition of the soil.

NOTE: To be use in conjunction with other approved conservation practices that specifically refer to Nutrient Management (590) for fertilizing.

600 ¥ Terrace

Definition: An earth embankment, a channel, or a combination ridge and channel constructed across the slope.

Purpose: To reduce erosion, reduce sediment content in runoff water, and improve water quality.

614 ¥ Watering Facility

Definition: a trough or tank, with needed devices for water control and waste water disposal installed to provide drinking water for livestock.

Purpose: To provide watering facilities for livestock at selected locations that will protect vegetative cover through proper distribution of grazing or through better grassland management for erosion control. Another purpose on some sites is to reduce or eliminate the need for livestock to be in streams, which reduces livestock waste there.

642 - Water Well

Definition: A well constructed or improved to provide water for irrigation, livestock, wildlife, or recreation.

Purpose: To facilitate proper use of vegetation on rangeland, pastures, and wildlife areas; to supply the water requirements of livestock and wildlife; to provide an adequate supply of water for conservation irrigation; and to provide for human use at recreation sites.

**OKLAHOMA CONSERVATION COMMISSION
INFORMATION TECHNOLOGY DIVISION MONTHLY SUMMARY**

Mike Sharp, Director

November, 2008

- Nick Huber attended the OACD Area 4 meeting in Weatherford on November 5.
- Shellie Willoughby attended the OACD Area 3 meeting in Wagoner on November 13.
- Mike Sharp attended the OACD Area 5 meeting in McAlester on November 18.

AML

- Worked with Dianne Ireton on scanning coal mine maps.
- Previewed the updated Abandoned Mine Land Information System (AMLIS) via a web conference with the Office of Surface Mining.

Tar Creek

- On the Southeast Commerce project, approximately 10 acres of the 40 acre site have been difficult to get vegetation growth. Lab tests indicate a very high level of gypsum in the soil which most likely is inhibiting plant growth. OSU recommends incorporating 20-30 tons/acre organic matter to allow leaching of salts below root zone. A low nutrient concentration horse barn litter consisting primarily of wood chips was incorporated at the rate of 20 tons/acre during the week of November 10.
- The subsidence that occurred on the West Commerce project in early October was filled during the week of November 3 by the City of Commerce.

Computer Systems

- Worked on various hardware and software support issues for OCC computer systems.
- Routine server, software and anti-virus and anti-spam maintenance.
- Worked with various conservation districts on IT issues.
- Coordinated OCC, NRCS and district IT issues.
- Recovered VPN (Virtual Private Network) service after failure of server. Restored to a spare server.

Geographic Information System (GIS) Activity

- Provided GIS and Global Positioning System (GPS) support to the AML Program.
- Provided GIS support to Conservation Programs, Water Quality Division and Rogers County Conservation District.
- Shellie met with OCC staff, Bureau of Indian Affairs and others in Anadarko on November 18 concerning GIS issues related to Sugar Creek activities.

Office of Geographic Information

- Worked with contractor, Coordinate Solutions, on Homeland Security grant.
- On November 13, Shellie Willoughby and Mike Sharp met at OU with May Yuan, Center for Spatial Analysis and Darryl Williams, Oklahoma USGS Geospatial Liaison, concerning the International Charter for obtaining satellite imagery during disaster or emergency incidents.
- Shellie attended the South Central Arc User Group (SCAUG) executive board meeting on November 6 in McKinney, TX.
