

# Flood Control Dams in Oklahoma Senate District No. 14

Oklahoma has 2,107 flood control dams in 61 counties. These dams have been constructed through local watershed project sponsors with financial and technical assistance from the USDA Natural Resources Conservation Service (NRCS) authorized through Public Law 78-534 (Washita River Watershed) and Public Law 83-566 Watershed Protection and Flood Prevention Program. There are 126 of these dams in Senate District No.14.

The primary purpose of flood control dams is to reduce flooding. The secondary benefits of the dams address a myriad of public needs such as water supply, water quality, soil health, water management, wetland enhancement, fish and wildlife habitat, and recreation. Flood control dams improve public safety, contribute to a healthy economy and support a strong nation.

Watershed projects also include the installation of natural resource conservation practices such as terraces, waterways, ponds, gully repair, and pasture and rangeland plantings. These conservation practices improve water quality and soil health and reduce sedimentation into the lakes formed by the dams.

## Operation and Maintenance of Dams

The annual operation and maintenance of dams is the responsibility of project sponsors (local units of governments such as conservation districts).

Operation is the administrative and management activities necessary to ensure the dams function as designed and remain safe. Operation work includes annual dam inspections and inspection immediately following heavy rains.

Maintenance work includes removing trees from dams and spillways, repairing erosion damage, repairing damage to the spillway and dams after heavy rainstorms, and keeping the principal spillway inlet towers cleared of debris.

## Operation and Maintenance Needs

Operation and maintenance of dams can be expensive and labor intensive. \$4 million is needed to operate and maintain all 2,107 flood control each year. Only through continued investment in operation and maintenance will future generations enjoy the promise of safety these dams offer.

## Annual Benefits

The 2,107 flood control dams and conservation practices in watershed projects provide \$91 million in average annual benefits. The table on the back of this page lists the annual benefits provided by watershed projects in Senate District No. 14.

## Rehabilitation and Dam Safety

As dams age some will need rehabilitation to remain safe and protect the people that live or work downstream.

At the conclusion of 2016, 260 flood control dams in the state have been classified as high hazard. Of these 115 do not meet current state or federal safety criteria. Approximately \$300 million is needed to upgrade the 115 dams.

Twenty of the 126 dams in Senate District No. 14 are classified as high hazard and have the potential for loss of life if it should fail.

The number of high hazard dams will continue to increase as long as residential and business development is allowed downstream of the dam in the breach flood area.

NRCS can provide 65 percent of the rehabilitation costs and technical assistance to rehabilitate high hazard dams. Local project sponsors provide 35 percent of the cost and obtain any needed additional land rights.

As of December 2016 thirty-five dams in the state have been rehabilitated and 18 others are in various stages of planning, design or construction.

One dam has been rehabilitated in Senate District No.14 (Mill Creek Dam No.18 in Johnston County) and two dams are scheduled for rehabilitation (Rock Creek Dams Nos. 15 & 17 in Murray County).

### Average Annual Watershed Benefits (Entire Watershed)

Watershed Name	Dams in Watershed	Dams in District 14	*Monetary Benefits	Farms/Ranches Benefited	Bridges Benefited	Wetlands Enhanced/Created (acres)	Reduced Sedimentation (tons of soil)
Caddo Ck.	28	28	\$2,179,828	697	17	796	126,254
Chigley Sandy Ck.	14	10	\$191,609	86	7	291	53,531
Delaware Creek	2	4	\$41,875	23	2	5	974
Kickapoo Sandy Ck.	20	14	\$240,851	104	8	305	49,728
Lower Bayou Ck.	15	15	\$1,110,120	125	4	213	41,374
Mill Creek	18	18	\$143,597	177	10	340	49,903
Pennington Creek	3	3	\$18,641	188	7	114	18,917
Rock Creek	17	15	\$373,531	337	10	259	41,129
Upper Bayou Ck.	8	8	\$370,346	93	3	266	43,612
Upper Clear Boggy Ck.	49	2	\$1,151,130	394	20	1,033	167,410
Wildhorse Creek	107	9	\$5,631,557	629	31	1,250	509,141
<b>Total</b>	<b>281</b>	<b>126</b>	<b>\$11,453,085</b>	<b>2,853</b>	<b>119</b>	<b>4,872</b>	<b>1,101,973</b>

\*Monetary benefits include reduction in flood damages to crops, roads, bridges, fences, etc. and may include other benefits such as irrigation, municipal and industrial water supply and recreation.

Conservation districts are a primary sponsor of most watershed projects in Oklahoma. Listed below are conservation districts located in Senate District No. 14 that have watershed projects and other conservation agencies that can be contacted for more information about the watershed program.

**Arbuckle Conservation District**

2428 Autumn Run Road, Ste. A, Ardmore, OK  
[arbucklecd@conservation.ok.gov](mailto:arbucklecd@conservation.ok.gov)

**Johnston County Conservation District**

1014 North Kemp, Tishomingo, OK  
[johnstonccd@conservation.ok.gov](mailto:johnstonccd@conservation.ok.gov)

**Love County Conservation District**

1215 N. Highway 77, Marietta, OK  
[loveccd@conservation.ok.gov](mailto:loveccd@conservation.ok.gov)

**Murray County Conservation District**

3490 Highway 7 W, Sulphur, OK  
[murrayccd@conservation.ok.gov](mailto:murrayccd@conservation.ok.gov)

The Oklahoma Conservation Commission is the lead state agency for upstream flood control programs and provides assistance and guidance to conservation districts.

The USDA Natural Resources Conservation Service (NRCS) is the federal agency that administers the watershed program and provides technical and financial assistance to the local project sponsors.
