Oklahoma State University is setting up Demonstration Agriculture Farms near Tulsa. The Oklahoma Conservation Commission is working with the medical field on prescribing fresh produce as a healthy way of living. Mr. Lam noted that soil health is important as it produces healthy food. Mr. Lam is working with Ms. Blaney on State Meeting planning for meetings coming up on February 27 – March 1, 2022. Mr. Lam participated in the Budget Hearing with the Senate and Joint Committee in attendance. Mr. Lam stated it was a positive meeting with legislature.

Water Quality Program: Shanon Phillips, OCC Water Quality Division Director, Ms. Phillips stated that there was a report in the packet and would be happy to answer any questions. Ms. Phillips stated that the Soil Health Program was closing in on the first two soil health economic studies and hoped to have something substantive to present on the studies by the Oklahoma Association Conservation District State Meeting. The Poultry Neighbors Project has identified demonstration farms in two of the three program areas of focus and hope to have the final initial demonstration farm identified after a trip to the Little River Conservation District this month. Finally, Ms. Phillips thanked Bryan Painter, Brooks Tramell, Dan Dvoretz, and Jason Ramming for an interview with OETA that aired on December 17th about the role of the water quality monitoring program in protecting streams and supporting the conservation district partnership. For those who missed the episode, it is available on the OETA website, by simply googling December 17th, 2021 Oklahoma News Report, and the segment begins at about the 18-minute mark.

Office of Geographic Information and Technical Services: Shellie Willoughby, GIS Specialist, stated that there was a written report in the packet and would be happy to answer any questions. Office of Geographic Information is putting together an American Rescue Plan Act proposal for Statewide 12- inch leaf off aerial photography with 6- inch leaf off aerial photography. This will be for urban areas which will include LiDAR data. The last time the State of Oklahoma had a leaf off flight was 1995. Oklahoma has been using National Agriculture Imagery Program photography provided by the U.S. Department of Agriculture and Natural Resources Conservation Service for base photography. The National Agriculture Imagery Program photography is leaf on which causes issues in the eastern part of the State. With the leaf on photography you are unable to see through trees to view roads, houses, etc. The datasets Office of Geographic Information is hoping to collect with the American Rescue Plan Act funds can be utilized by State Agencies, law enforcement, 911, and various other entities. The data will be made available for free download to the public through our OKMAPS Data Clearinghouse.

Abandoned Mine Lands Reclamation: Robert Toole, Director, stated that a written report was in the Commissioner's packet. Mr. Toole summarized the December 2021 AML Program activity stating: construction was completed on two (2) projects; contracting is on hold for 2 projects pending funding; vegetation management & maintenance monitoring is being performed on nine (9) projects; six (6) projects are in the design phase; three (3) sites are in realty phase and one (1) maintenance project is scheduled. Additionally, Mr. Toole distributed an OCC News Release published last week regarding AML funding. Mr. Toole stated that the Bipartisan Infrastructure Law signed by the President authorizes more funding for AML reclamation over the next 15 years than the total amount available over the last 40 years since the AML program has

been in existence.

Blue Thumb—In Pictures

January 2022

It's a Small World

Since its inception, the Yard by Yard program has really taken off in Oklahoma County, Tulsa County, and several other counties across the state. This community resiliency project encourages homeowners to implement practices that improve water quality and soil health, provide wildlife habitat and grow delicious and nutritious food. Pollinator plots are a practice implemented by many participants. This month was a “full circle” moment as the newest yard certified belongs to a woman who was Blue Thumb’s summer intern in 2002 (right).

Mow No More

Speaking of riparian areas, Blue Thumb volunteer Karen Chapman has been working with Friends of Blue Thumb and Norman Parks and Recreation to install an educational sign near Bishop Creek in Eastwood Park.

The sign explains the benefits of “no mow” zones around streams. This sign will help educate people about the importance of riparian areas for Bishop Creek and for all streams. Take a walk in Eastwood Park and check out the new sign! (left).

Back to the Start

At the end of December we bid bug picking season farewell; in January we begin anew with winter bug collections! Staff and dedicated volunteer stream monitors brave all sorts of weather during the winter index period (January through mid-March) to get samples. Like the critters in the creeks we visit, we adapt and get it done!

Education, Education, Education

New Year, new education opportunities! Staff hit the ground running with Cheryl teaming up with Blue Thumb volunteer Brian Bovaird at Flat Rock Creek near the Tulsa Dream Center. Together, they worked on developing curriculum for elementary age students who will participate in outdoor STEM activities at the Dream Center this spring. Lifelong Girl Scout, Kim, worked with Girl Scout Troop 798. The girls are working on a project during which they will learn about Little River and the Lake Thunderbird watershed, visit the creek and pick up trash, and then spread their knowledge to others through an outreach activity.
