## **FISCAL YEAR 24 - PROPOSED DISTRICT POLICIES**

1. All employee positions (District and Commission) that become vacant will be reviewed and will require justification before approval to fill the position. Future employee allocations will be dependent on the level of legislative appropriations.
2. The maximum number of hours for a non-benefitted temporary part-time district employee is 999 hours. If hours exceed 999 in the 12-month period from the employee's hire date, the district will be responsible for the employer's share of retirement contributions and payment of longevity and benefit expenses, if applicable.
3. District operating expense allocations will be based upon each district's submission of required reports and documents. The allocation is based solely on whether the deliverable was completed with all required elements and submitted on time.
4. Failure to perform audits and/or submit preclaim payments for retirement and insurance within the established timeframe will result in OCC withholding payment of district claims until compliance is accomplished.
5. For a district to remain eligible to continue receiving a personnel allocation from OCC the district must conduct annual performance evaluations during the fiscal year on all staff and notify OCC in writing of the review's completion.
6. Fiscal Year allocation will not be made for a district until a draft of the Joint Plan of Operations has been submitted for review. The Joint Plan of Operations is effective July 1 each year and serves as justification for allocating funds.
7. For a district to remain eligible to continue receiving an allocation from OCC, adoption of the Conservation District Handbook and completion of the acknowledgment form by all staff and board members must be completed by September 30, 2023.

**WATER QUALITY DIVISION**  
**JUN MONTHLY SUMMARY**  
Shanon Phillips, Director  
June 22, 2023

**IR Riparian Easements**

**Illinois River Riparian Easement Report**

Water Quality Division, Oklahoma Conservation Commission

*Report for Brooks Tramell*

***Purpose and Scope of Program***

- Long-term lease agreements restrict the use of riparian corridors along streams in the Illinois River Watershed. This program was intended to supplement the Conservation Reserve Enhancement Program (CREP) by covering gaps in riparian areas not covered by the rigid qualifications in CREP and therefore allowing landowners the opportunity to enroll contiguous reaches to effectively manage property by whole corridor riparian exclusion.

***Routine Programmatic Responsibilities***

- Programmatic administration and tracking: Enrolled contracts and properties are reviewed, and participants paid annually if meeting contract requirements. District and NRCS staff in the Adair, Cherokee, and Delaware County Conservation Districts are integral to this program and help complete most activities.

***Annual Status:***

- Currently, twenty-one (20) contracts/properties are in process for annual payments, totaling 1,093 acres of exclusion, with an expected payout of \$66,601.50.
- Adair County accounts for most of the contracts, with seventeen (17) participants, covering 801.5 acres, with an expected payout of \$48,090.
- Cherokee County has two (2) current contracts, covering 242.5 acres, with an expected payout of \$15,277.50.
- Delaware County has one (1) remaining contract of 49 acres, with an expected payout of \$3,234.00.

## June 2023

### Blue Thumb welcomes New Volunteers from OKC Training!

Left, the newest Blue Thumb volunteers who attended Blue Thumb training in Oklahoma City on June 3 & 4.

Below—look closely and you will see that the new volunteers are in two groups. The ones in the background are getting an education on creek bugs. The volunteers in the foreground are learning about fish. On day two the new volunteers focused on the chemical testing.

Left, first fish collection of 2023! Intern Lillian with Blue Thumb's newest staff member Briant.

This is Chisholm Creek in Oklahoma County. Fish below:

Orangespotted sunfish, red shiner, bluegill sunfish, largemouth bass, redear sunfish, longear sunfish.

Background Blue Thumb intern Lillian and staff members Briant and Rebecca, and volunteer Dan Brobst.

Recent educational activities in the Tulsa area have included Briant and Cheryl: far left heading to Crow Creek with students from Tulsa's DiscoveryLAB, and at Ray Herral Nature Park with summer campers. Both events featured an introduction to aquatic insects and fish.

**DATA WORKSHOP 201:**  
 INTERPRETING  
 CHEMICAL DATA

**JUNE 8, 6-7 PM**

SEE YOU THERE!

Blue Thumb's second webinar devoted to understanding data was held on June 8. QA officer Kim Shaw focused on providing information about the chemical data—the data generated each month by volunteers as they test their stream water.

Blue Thumb volunteers can be counted on to help young people understand how water can become polluted and how everyone can protect our streams and rivers. Recently Zack Henson, Stillwater, and Patrick Hays, Tulsa, borrowed an EnviroScope watershed model and used the model with summer camp students. Left are children from Stillwater, and right are children from Tulsa.

Blue Thumb staff joined the Tulsa Regional STEM Alliance and Chandler Park/Tulsa County to bring two STEM Professional Development workshops to teachers throughout the Tulsa area on June 9 & 13. One activity was the demonstration of a hand-made rainfall simulator. Using pop bottles and landscape net, the bottles were transformed into holders for different landscapes, including lawn, prairie, forest, and construction site. Also in use was a small replica of a parking lot.

The teachers were able to hold the models and rain on them, and witness firsthand how the healthy soil of the prairie and forest produced little runoff and encouraged deep infiltration of the rain...and they learned how easy it is to make the models. Engaging lessons on the value of healthy soil is just as important for students as it is for adults.

**BELOW...** Farm Camp is a little like summer camp, except it has some more rural themes. These students at AC Farm in Jones, OK, spent time with dogs, goats, chickens, and even fish in the farm pond! They all took turns with the seine and then they all freed the scaly specimens!

Oklahoma Conservation Cost-Share Program

The Program Year 24/Allocation began December 1, 2021, and the Program/Allocation will end April 30, 2023. The district received \$30,300 in State Cost-Share funds this year. The funds were paid depending on the practice chosen. The cost share rate and maximum payments were as follows: 561-Heavy Use Area Protection \$500.00 up to 85%, 516-Livestock Pipeline, 528-Prescribed Grazing, 614-Watering Facility \$1,000.00 up to 85%, 314-Brush Management, 315-Herbaceous Weed Control \$1,500.00 up to 85%, 382-Fence, 394-Firebreak, 512-Forage and Biomass Planting, 325-High Tunnel, 338-Prescribed Burning, 642-Water Well, \$2,500.00 up to 85%.

The Conservation District Board obtains input from citizens to determine which conservation practices will be included in the program each year.

Free Soil Testing for Cherokee County

The Cherokee County Conservation District will continue to pay for the soil testing handled by the OSU Extension Office. The cost of soil testing is \$10.00 per test, with no limit on test brought in by consumers. The district amount paid since July 2021, was \$2,860.00 for a total of 286 test.

District Directors

A conservation district has two appointed directors for a term of two years and three elected directors with a term of three years. Our district directors are as follows: Glen Clark-Chairman, Jerry Hammons-Vice Chairman, Jerry Don Latty-Treasurer/Secretary, Sally Roberts-Member, and Dale Hutchins-Member. The district also has a total of three Associate Directors, Les Ritz, Susan Minnick, and Blake Stephens.

The Cherokee County District Board Meeting is the first Wednesday at 8:30 a.m. monthly and represent land users within the district in setting conservation priorities and carrying out day-to-day operations of the district. They enter into cooperative agreements with state and federal agencies for various kinds of conservation assistance.

Natural Resources Conservation Service

The USDA Natural Resources Conservation Service (NRCS) has employees assigned to the districts to provide technical and cost share assistance, and the NRCS field office staff shares office space with districts in most locations, including Tahlequah.

Equipment available through the Cherokee County Conservation District

The Cherokee Conservation District provides a Hog Trap available for use with a \$50.00 deposit, which is returned upon returning of the trap.

*The Water Quality Division (WQD)*  
*Monitoring, Assessment & Wetlands*

The existing partnership between conservation districts, NRCS and OCC is a large reason why Oklahoma is #1 in the nation in ‘Success Stories’, or documented water quality improvements in streams that can be directly tied to implementation of practices within a watershed.

OCC’s Blue Thumb and Soil Health programs can provide a number of educational opportunities for a wide-array of audiences ranging from students, to producers or the general public. These education events can engage the community and bring awareness to the conservation issues that OCC and districts work to improve. In addition to conducting education events, Blue Thumb trains volunteers to monitor local stream water quality, can loan equipment, or help with creek cleanups.

OCC’s Rotating Basin Program monitors almost 300 streams statewide and is a primary way we can prove the water quality benefits of conservation practice implementation. OCC monitors each stream for two out of every five years, before moving to another part of the state. The last rotation that included Cherokee County took place from June 2018-May 2020 and included on 4 streams: Elk Creek; Manard Bayou; Steeley Hollow Creek; and Telemay Hollow Creek. In 2023, OCC will next begin monitoring streams in Cherokee County from June 2023-May 2025. The attached report discusses the data collected at streams during the last rotation through your district.

The Water Quality Division (WQD) at the Oklahoma Conservation Commission (OCC) has a variety of programs that districts can engage in voluntarily to help meet long and short-term water quality and soil health goals. The bottom-line, should any district want support, the OCC WQD is here to help.

Brooks Trammel—Director of Monitoring, Assessment & Wetlands

*Yard by Yard*

Blue Thumb also sponsors the relatively new ‘Yard by Yard Community Resiliency Project’, which encourages “conservation friendly” practices in cities and towns.
